OBJECTIVE

Data enthusiast with experience in data extraction, cleaning, and visualization using Python, SQL, and Excel. Eager to apply technical skills and a strong willingness to learn in data analyst roles to help teams make informed decisions.

EXPERIENCE

PCL - PayrollCloud Corp.

May. 2024 - Current

Integrated Solutions Engineer

- **Extracted** and **validated data** from Oracle HCM APIs to create structured datasets, ensuring accuracy for AI-powered analytics tools.
- **Transformed** and **analyzed HR data** using Python and MongoDB, supporting interactive dashboards built with Next.js to drive data-driven decision-making.
- Collaborated in **requirements gathering** and **data sourcing** for analytics projects, contributing to end-to-end development and deployment of internal data solutions.

SKILLS

Programming Languages: Python

Libraries/Frameworks: NumPy, Pandas, Matplotlib

Data Analysis & Visualization: MS Excel, Tableau

Databases: MS SQL Server, MongoDB

Data Formats: JSON, CSV

EDUCATION

Indian Institute Of Technology Guwahati

Guwahati, Assam

B.Tech, Chemical Science and Technology, CPI 8.39

2020 - 2024

PROJECTS

Analysis of Netflix Original Movies: Insights & Recommendations

May. 2024

Self Project

Peerlist

- Conducted in-depth data analysis of Netflix's original movie dataset using **Microsoft Excel**, employing advanced functions and visualizations to uncover patterns leading to actionable insights for content optimization.
- Created a **Tableau dashboard** and a report presenting actionable recommendations on genre, pricing, and marketing based on viewer preferences.

Data Analysis on IMDB Data Sets using SQL

Dec. 2022

Self Project

Github

- Analyzed IMDB datasets by merging multiple tables and performing complex data queries using **MySQL** to generate insights for RSVP Movies' project recommendations.
- Utilized joins, views, subqueries, and advanced SQL queries to evaluate movie ratings, genres, and actor performances for data-driven decision-making.

Uber Data Analysis using Python

June 2022

Self Project

Github

- Analyzed and visualized geospatial and time series data of NYC Uber trips to identify high-demand areas, revealing opportunities to optimize profits and improve customer service, particularly in lower Manhattan during weekends.

CERTIFICATIONS

- Completed **The Complete Oracle SQL Certification Course** on Udemy, gaining proficiency in SQL querying and database management.
- Completed **Accenture North America Data Analytics and Visualization** simulation on Forage, cleaning and analyzing multiple datasets to deliver insights and present strategic recommendations to stakeholders.
