SUMMARY

Seeking a position where I can utilize my knowledge and management skills to contribute my best to the organization I work for and build a career that offers challenges, growth with opportunities. Experienced in data analytics, with a focus on projects involving data manipulation, visualization, and probability calculations. Skilled in SQL, R Project, Python, and machine learning. Strong background in computer science and proficiency in algorithms, statistics, and data science. Graduated with a post-graduate program in data science and machine learning. Excellent problem-solving and communication skills.

EDUCATION

Bachelor in Computer Application

Sep '19 - Jun '22

Commerce management and computer science college | Nashik

Course-Post graduate programme in data science and machine learning

Intelipaat |

HSC

Sep '17 - Jun '19

Matoshri Education Nashik | Nashik

Sep '16 - Jun '17

Ryan International School | Nashik

INTERSHIPS

Data Analytics Trainee

Nov '23 - Dec '23

MadeToueasy |

Import, clean, manipulate, and visualize data—all integral skills for data professional or researcher. I got hands-on with some of the most popular Python libraries, including pandas, NumPy, Matplotlib.

Analyst Responsibilities: • Week 1 & 2: Series of Training Modules (Training Period) • Week 3 : Project Assigned • Week 4: Project Report to be submitted

PROJECTS

Analyze Death Age Difference of Right Handers with Left Handers

Nov '23 - Dec '23

Madetoueasy |

The project aims to examine the age distribution of individuals at the time of their death, specifically focusing on the comparison between left-handed and right-handed individuals. The project includes several tasks that involve data manipulation, visualization, and probability calculations. Tools: - SQL, R

Customer churn

Aug '23 - Sep '23

|

This project aims to use the available information to build a machine learning model that will accurately predict which consumers will likely quit a company, enabling the business owner to make better-informed decision with the help of liner regression algorithm. Tools - Python, machine learning

KEY SKILLS

- Python -Libraries like NumPy, Pandas, matplotlib, statistics, scipy, etc.
- SQL
- Microsoft Power BI
- Microsoft Excel and Google Spreadsheets.
- Machine Learning
