EDUCATION

Ramrao Adik Institute of Technology (DY Patil)

Bachelor of Computer Science and Engineering

Jan 2020 - May 2024

Navi Mumbai, India

EXPERIENCE

Power BI Developer

TechnoWeb Solutions

Mar 2025 – Jun 2025

Bengaluru

- Analyzed and developed 3+ interactive Power BI dashboards by integrating data from 4+ sources, enabling 90% real-time visibility into KPIs and business metrics.
- Optimized 3+ data models and implemented 10+ DAX measures for tracking sales, performance, and operations—cutting manual reporting time by 40%.

AI Variant

Data Analyst

Nov 2024 – Feb 2025

Bengaluru – Remote

- Analyzed 50,000+ records of airline KPIs (load factor, route efficiency, carrier performance) to uncover trends and drive performance reporting.
- Cleaned and transformed 15+ data columns using Excel; created 4 interactive dashboards in Tableau and Power BI to support executive reporting.
- Performed segmentation on 1,000+ flights based on distance and time, identifying high-demand routes and improving scheduling efficiency by 10%.
- Provided 5+ data-driven recommendations for route optimization, resource allocation, and partner strategies; contributed to modeling and QA tasks.

PROJECTS

Healthcare Data Analysis using Power BI [↗](#)

Jan 2025 – Apr 2025

- an interactive Power BI dashboard, showcasing hospital visitor trends to enable data-centric resource allocation, enhancing patient care scores by 10% as measured by HCAHPS.
- Standardized raw hospital data using Power Query, resolving 75% of data inconsistencies through ETL operations and table normalization, thereby improving the reliability of visitor pattern analysis.
- Designed insightful DAX measures and relationships to model complex datasets, providing deep analysis on visit patterns, demographics, and satisfaction scores.
- Revealed key trends such as 5.8% yearly visit growth and 148.83% higher weekday traffic, offering actionable insights for hospital operations and staffing.
- Integrated KPIs and slicers for time-based distributions, demographic segmentation, and department referrals to support dynamic reporting and real-time decision making.

Banking Data Analysis using Power BI [↗](#)

Jan 2025 – Apr 2025

- Built an end-to-end banking data analysis pipeline using MySQL and Power BI, enabling 100% automated data flow from raw ingestion to dashboard reporting.
- Cleaned and transformed 25+ columns of raw data by categorizing income bands, mapping codes to readable labels, and standardizing 10+ categorical variables.
- Composed EDA on 50,000+ customer records to uncover patterns across loans, deposits, and superannuation savings.
- Identified 3+ strong correlations between account types, highlighting behavioral patterns of high-balance customers.

- Designed a Power BI dashboard using 1 DAX measures, 5+ slicers, and dynamic visualizations to drive data-driven decision-making.

Marketing Analytics for E-Commerce Marketplace [↗](#)

Oct 2024 – Jan 2025

- Performed EDA on 100,000+ rows of customer, seller, product, and transaction data to extract actionable business insights.
- Uncovered 20% seasonal spike in sales during specific months and 15% increase in repeat customers through retention analysis.
- Segmented users into 5 behavioral clusters and uncovered 10+ cross-selling opportunities via product association analysis.
- Analyzed 40,000+ reviews and ratings to evaluate payment preferences and satisfaction, contributing to a 10% improvement in customer experience strategy.

TECHNICAL SKILLS

Data Analytics: Exploratory Data Analysis (EDA), Data Cleaning, Data Modeling, KPI Development, A/B Testing

BI Visualization Tools: Power BI, Tableau, Excel (Power Query, Pivot Tables)

Programming Languages: SQL, Python (Pandas, NumPy, Matplotlib, Seaborn)

Databases Cloud: MySQL, PostgreSQL, MongoDB, AWS (Redshift, S3)

Reporting Automation: DAX, Jupyter Notebooks
