Operation Management
E-Commerce

PROJECTS

CRM Project

- Developed and implemented a dynamic Lead Performance Dashboard to monitor and analyze key metrics such as total leads, conversion rates, lead source effectiveness, and industry-wise segmentation—enhancing marketing and sales alignment and driving data-backed decision-making for improved ROI.
- **Tools Used:** Power BI, DAX, Excel, MySQL, Data Modeling, Power Pivot

Sales Analysis

- Designed and developed an interactive Sales Dashboard using Power BI to provide real-time insights into sales performance, cost analysis, profit margins, shipping trends, and product category performance, enabling data-driven decision-making and business efficiency.
- **Tools Used:** Power BI, DAX, Excel, Power Pivot, Data Modeling, Visualization Best Practices

EXPERIENCE

Data Analyst Intern

Ai Variant

Sept 2024 - July 2025

- Developed dynamic dashboards to visualize core KPIs, including revenue projections, conversion ratios, win/loss metrics, and sales funnel trends and reduced reporting time by 30% using Power BI automation.
- Connected and automated MySQL data with BI tools to enhance the efficiency of reporting and real-time analytics.
- Conducted detailed analysis of lead and opportunity data segmented by source, industry, sales stage, and opportunity type.
- Provided business insights through comparative analytics on forecasted vs. expected revenue and closed-won performance against total deals.

Roastery Operation Incharge / E Commerce Executive

Corridor Seven Coffee Roasters

Dec 2021 - Feb 2024

- Production Planning & Reporting: Designed and maintained daily and monthly analytical reports using Power BI and Excel, supporting data-driven decisions for production planning and inventory management.
- Report: Regularly analyzed operational performance metrics, extracted insights from reports, and presented actionable recommendations to improve processes and outcomes.

- **Process Improvement:** Identified and implemented workflow optimizations to improve operational efficiency and reduce costs, while upholding high-quality standards in roasting and packaging.
- **Compliance & Safety:** Ensured adherence to all health, safety, and regulatory requirements across the facility, aligning with internal policies and industry best practices.
- **Supply Chain Management:** Coordinated with suppliers and logistics partners to ensure timely procurement of raw materials and smooth distribution of finished goods.

■ **Social Media Manager**

Dygn Media Digital Marketing Agency

Aug 2021 - Nov 2021

As a social media manager, I managed organizations online presence by developing a strategy, producing good content, analyzing usage data, facilitating customer service and managing projects and paid campaigns. I was also provided a monthly report for suggestions & improvements for their Social Media Handles.

■ **E-Commerce Executive**

Factory Rates International Ltd

July 2020 - Aug 2021

- Manage end-to-end website operations, including content updates, maintenance, and optimization on the WordPress platform.
- Design digital marketing creatives such as banners for Facebook and Instagram campaigns to support promotional activities.
- Create visually engaging logos and graphics using Adobe Photoshop to align with brand identity.
- Coordinate with vendors and service providers across domains such as consulting, training, MIS (Management Information Systems), and telecommunications, ensuring smooth communication and issue resolution.
- Develop and maintain daily and monthly analytical reports using Microsoft Excel, providing valuable insights into sales, performance metrics, and operational trends.
- Contribute to data-driven decision-making through effective report generation and performance analysis.

■ **Data Entry Operator**

Shashi Menon Associates

May 2019 - Mar 2020

- Verified and validated critical documents such as Aadhaar Card, PAN Card, Balance Sheets, and Government-issued documents for loan applications.
- Assessed applicant eligibility for loans by preparing detailed reports based on document accuracy and financial assessment.
- Maintained and updated the MIS (Management Information System) file regularly, ensuring accuracy and timely submission to bank officials.
- Created monthly analytical reports using Microsoft Excel, incorporating data sorting, filtering, pivot tables, and charts for performance tracking and decision-making.
- Ensured compliance with banking and documentation standards to streamline loan processing and reduce approval delays.
