PROJECTS

RAG Model – Ground Water Detection <i>Python, OpenAI API, RAG</i>	2024
– Developed a Retrieval-Augmented Generation (RAG) model for analyzing groundwater-related documents. – Enabled multimodal understanding: text, tables, and image data for deep query insights. – Used Python with OpenAI API for document-based Q&A and summarization tasks.	
Employee Attrition Analysis (EDA + ANN) <i>Python, Pandas, Keras, Matplotlib</i>	2024
– Analyzed HR data using Exploratory Data Analysis techniques. – Trained an Artificial Neural Network to predict attrition risk.	
Face Detection and Attendance System <i>Python, OpenCV</i>	2023
– Built a model to detect faces from a webcam and mark attendance in real time. – Converted images to grayscale and used rectangle methods for face highlighting.	

EXPERIENCE

Data Analyst Intern – Deloitte <i>Internship</i>	6 Apr 2025 – 6 June 2025 <i>3 months</i>
– Worked on analyzing organizational data for business insights using Python and SQL. – Collaborated with senior analysts to design dashboards for internal reporting.	
Data Science Intern – CodSoft <i>Virtual</i>	Nov 2023 – Dec 2023
– Completed projects like Movie Rating Prediction, Sales Prediction, Titanic Survival Prediction. – Gained practical exposure to machine learning and data analysis pipelines.	
Web Development Intern – Elite Software <i>Virtual</i>	Oct 2023 – Dec 2023
– Worked on portfolio and blog website development using HTML, CSS, JavaScript, Bootstrap, and Django.
