CAREER OBJECTIVE

Seeking to leverage a unique blend of skills in React.js and Python-based machine learning to contribute to innovative projects. Proven experience in building high-performance UIs, integrating RESTful APIs, and developing intelligent features through data preprocessing, feature engineering, and model building.

TECHNICAL SKILLS

Programming Languages and Tools:

React.js, JavaScript, HTML5, CSS3, Tailwind, React Hooks, Context API, Responsive Web Design, Git, VS Code, FastAPI.

Machine Learning & Data Visualization:

Data Preprocessing, Pandas, NumPy, Feature Engineering, Data Visualization.

PROFESSIONAL EXPERIENCE

Data Engineer Internship

Altysys 

March 2025 – June 2025

Pune

- Built a machine learning system to predict HbA1c values, patient visits, and revenue for chronic disease patients using FastAPI and Random Forest.
- Improved a chatbot UI using React.js and Tailwind CSS for responsive layouts, reducing load time by 15%.
- Debugged React components for a document summarization tool to improve feature stability.

Software Developer Internship

VishvaConnect: 

July 2024 – January 2025

Pune

- Developed an eBook and audiobook platform using React.js with reusable components and responsive design.
- Built machine learning models for sales forecasting and inventory planning.
- Built an AI-powered chatbot using Ollama for government projects and developed a WebView-based Android APK for platform access.

Software Developer Internship

Incronix Technology : 

February 2024 – May 2024

Pune

- Developed the company website with React.js and EmailJS API, ensuring responsive design.
- Built a Web Quotation Calculator using React.js to streamline client requirement collection.

EDUCATION

Indira College of Engineering & Management, Pune

Master Of Computer Applications (MCA)

CGPA: 8.63

June 2022 – July 2024

Pune

Indira College of Commerce & Science, Pune

Bachelor in Computer Applications (BCA)

CGPA: 8.83

July 2019 – March 2022

Pune

PROJECTS

PetMed

Android Application

Technologies Used- Android, Java, XML, SQL.

- Developed an app for pet care appointments and prescription management using Java and SQL.

MindSpark

Web Application

Technologies Used- HTML, CSS, JavaScript, Bootstrap, SQL

- Built an e-learning platform with authentication and resource management using HTML, CSS, Bootstrap, and SQL.

CERTIFICATIONS

- Python HackerRank
Certification

HackerRank

- Data Science Professional
Certification

- Web Development

Bootcamp

Udemy

- Introduction to
GenerativeAI

- Prepare Data for

Exploration

Google

- Databricks for Machine
Learning

Databricks

- IEEE Student Membership

IEEE Organization

DECLARATION

Open to opportunities at Centralogic to apply React.js and frontend skills in building scalable, user-focused web applications while continuing to enhance my ML capabilities.
