Summary

Data Analyst with hands-on experience in healthcare and life science industry. Skilled in SQL, Excel, and Tableau to analyze and transform data into valuable insight for business decision making. Built interactive dashboards and automated Excel reports that improved operational efficiency and reduced manual reporting time. Passionate about continuous learning and applying data-driven insights to solve real-world business challenges.

EDUCATION

DATA SCIENCE ExcelR Pune, Maharashtra	Mar 2024 – Sep 2024
--	----------------------------

B.SC B.ED CHEMISTRY Ashoka College of Education, Nashik, Maharashtra	2020 –2024
---	-------------------

EXPERINCE

Am Infoweb	Jan 2025 – July 2025
-------------------	-----------------------------

Data Analyst Intern

- Streamlined data ingestion for the Data Warehouse by transforming and cleaning large datasets to align with business requirements.
- Processed and managed sales and product data, collaborating with Ontellus team to ensure consistent data integrity.
- Designed dashboards in Power BI to monitor KPIs such as turnaround time, record request status, and client satisfaction.
- Identified delays in the record retrieval lifecycle and proposed process changes that reduced average retrieval time by 15%.
- Designed visual presentations and monthly executive summary reports to communicate insights effectively to clients and onshore teams using PowerPoint and Excel.
- Tools used: MySQL, Excel, Power BI.

AI Variant	Sept 2024 – Dec 2024
-------------------	-----------------------------

Data Science Intern

- Conducted in-depth analysis, resulting in the identification of 10+ key trends and insights that informed strategic decision-making processes.
- Launched dashboards for non-sales users, enhancing data accessibility across multiple roles.
- Delivered 10+ dashboard and report developments and conducted User Acceptance Testing (UAT) before production deployments

PROJECT

Request Velocity Analytics (RVA)

- Conducted in-depth analysis of request lifecycle stages using SQL, Excel, and Power BI.
- Mapped turnaround time (TAT) across stages Research, Follow-up, Record Receipt, Invoice, Delivery to pinpoint inefficiencies.
- Discovered key bottlenecks that led to 15–20% delays in record delivery, recommended process improvements and follow-up cadence adjustments that reduced TAT by 15%.

Electric Motor Speed Prediction Project

- Performed exploratory data analysis (EDA) using python to identify key features and correlations impacting electric motor performance.
- Designed an interactive dashboard in Tableau to visualize motor speed trends, sensor correlations, and prediction outputs.
- Tools used: Python, Pandas, Numpy, Jupyter Notebook, Matplotlib, Tableau,.

Diabetic Retinopathy Prediction Project

- Applied data cleaning and exploratory data analysis (EDA) to improve accuracy.

- Built and deployed a machine learning model for early detection of diabetic retinopathy using patient data and Streamlit.
- Skills Applied: Analytics, Collaboration

SKILLS

Languages : SQL, Python

Tools : Excel, Power BI, Tableau

Cloud Platforms : AWS, Azure

Soft Skills: Presentation and Story telling, Critical Thinking, Problem Solving.

CERTIFICATIONS

Data Science – ExcelR

Data Analyst : Excel formulas and functions – Simplilearn

Internship Certificate - AI Variant
