Objective

To Work in a healthy, innovative and challenging environment extracting the best out of myself. Basically, an environment which is conducive to learn and grow at professional as well personal level and hence contribute in growth of both, me as an individual and the organization as well with my skills as software professional.

Education

Dr Dy Patil Institute of Management & Research Master of Computer Application, Secured 7.95/10.0 CGPA	Pune, India 2025
Pratibha College of Commerce & Computer Studies Bachelor of Business Administration in Computer Application, Secured 7.7/10.0 CGPA	Pune, India 2022
Pratibha Junior College Higher Secondary Education	Pune, India 2019
Saraswati Bhuwan English School Secondary Education, Secured 66%	Pune, India 2017

Experience

Prodigy InfoTech. Feb 2025 – Mar 2025

Web Developer Intern

- Developed and deployed dynamic web applications using HTML, CSS, React, Javascript and Java.
- Gained hands-on experience in Front-end and Back-end, working with modern framework.
- Collaborated with senior developers to enhance user experience and optimize website performance.
- Implemented interactive features and improved website performance.
- Strengthened problem-solving and debugging skills while working on real world projects.
- Strengthened understanding end-to-end web application development and agile project management.

PROJECTS

Disease Prediction System May 2023 – July 2024

- Build a full-stack web app using HTML, CSS, Javascript, Python (Flask), SQLAlchemy, MySQL, Bootstrap for disease prediction and symptoms based on user-input.
- Integrated a chatbot, BMI calculator with personalized health tips, and nearest hospital Suggestion.
- Designed a responsive and user-friendly interface with secure user authentication and data handling

Mobile Store Billing Management System Aug 2024 – Dec 2024

- Build a desktop application in java using Apache NetBeans, with a user-friendly GUI for managing Billing, inventory and customer records.
- Integrated MySQL database using JDBC, enabling product search, CRUD operations and automatic Invoice generator.

Weather Application Jan 2025 – Apr 2025

- Created using HTML, CSS, React and Javascript and display real-time weather data based on user input.
- Implemented features like city-based weather search, temperature, humidity with clean interactive UI.

ACHIEVEMENTS

Academics:-

- Completed a Java Programming certification, gaining strong foundational and Object-Oriented Programming skills.
- Earned Python certificate, focusing on data handling, functions and file operations.
- Achieved a Database Management with MySQL certification, covering SQL queries, normalization and RDD.

TECHNICAL SKILLS

Programming languages: C #, Java, Python, C++, JavaScript

Web Development: ASP.NET, ASP.NET Core, MVC, Razor Pages, Web APIs, React.js, Angular (basic), HTML5, CSS3, JavaScript

Database Technologies: SQL, MySQL, Entity Framework, LINQ, JDBC

Frameworks & Tools: .NET Framework, .NET Core, Visual Studio, JMeter, SQL Server Management Studio, Git

Concepts: Object-Oriented Programming (OOP), Data Structures and Algorithms, Dependency Injection (DI), Microservices

Architecture (beginner), RESTful APIs

Cloud & Data Engineering: Familiarity with cloud concepts and architecture, exposure to Snowflake (data warehousing), understanding of data pipelines and storage systems

Soft Skills: Strong Analytical Skills, Effective Communication, Team Collaboration, Quick Learner, Problem Solving, Adaptability, Attention to Detail

Interest

Software Development, Competitive Programing
