Career Objective

Recent B.Tech in Computer Engineering with strong skills in Python, SQL, Excel, and Power BI. Completed predictive modeling and dashboarding projects that generated actionable insights. Seeking an Data Analyst role to help organizations drive data-informed decisions.

Education

B.Tech in Computer Engineering – Vishwakarma University, Pune
Nov 2022 – Jun 2025

- GPA: 7.85/10
 - Relevant Coursework: Database Management, Applied Statistics, Machine Learning, Data Structures
- (Diploma in Computer Technology – MSBTE, Pune | 77.43%)
-

Technical Skills

- Languages & Tools: Python (Pandas, NumPy, scikit-learn), SQL (MySQL/PostgreSQL), Excel, Power BI
 - Data Techniques: Data cleaning, exploratory data analysis (EDA), statistical analysis, regression modeling, data visualization
 - Soft Skills: Problem-solving, data storytelling, effective communication, attention to detail
-

Experience

Web Development Intern – Kosha Solution, Pune
Jan 2025 – Jun 2025

- Developed front-end features using React and ensured input data validations
 - Implemented backend endpoints with Node.js & MongoDB; ran functional tests & logged bugs
 - Collaborated with a 4-member team
-

Projects & Achievements

Healthcare Insurance Dashboard | Power BI

- Designed interactive dashboards tracking patient demographics, lab results, and insurance claims
- Used advanced slicers and DAX measures to enable drill-down views by age, region, and treatment type
- Cleaned and processed raw datasets in Excel; created KPIs like claim approval rate & patient average treatment cost
- Delivered dashboards that supported data-driven decisions to optimize care and resource allocation

House Price Prediction | Python, scikit-learn

- Built a linear regression model to forecast house prices
 - Performed EDA, feature engineering, and handling of missing values and outliers
 - Visualized correlations and model performance using Matplotlib and Seaborn
-
