Education

Maulana Abul Kalam University of Technology

Sep. 2021 – June 2025

Bachelor of Technology in Computer Science Engineering - CGPA:8.5

West Bengal

Relevant Coursework

- Data Structures
- Discrete Mathematics
- Artificial Intelligence
- Probability Theory
- Algorithms Analysis
- Database Management
- Machine Learning
- HCI

Experience

Pantech Solutions

July 2024 - October 2024

Data Science Trainee

- Hands-on training in AI, ML, Deep Learning, and Data Analytics Technologies with real-life projects.

Edunet Foundation, shell, AICTE

Dec 2024 – January 2025

Internship

Remote

- Worked on data collection, cleaning, preprocessing, and exploratory data analysis (EDA). Built and evaluated machine learning models (Random Forest, SVM, Deep Learning) for disease outbreak prediction.
- Delivered final project presentation to experts, along with technical documentation and Jupyter Notebook demos.

Infosys Springboard

January 2025 – Present

Project Intern

Virtual

- During my internship, I built AI-driven healthcare solutions using RAG, LangChain, Hugging Face, and Pandas AI agents. I also created a patient support chatbot for handling queries, appointments, and reminders. To make these solutions accessible, I designed a Streamlit frontend. My work focused on improving data access, decision-making, and patient interaction in the healthcare domain.

Projects

RAG and AI Agents for Healthcare | *Langchain, Pandas AI, Hugging Face, and Streamlit*

March 2025

- Developed AI agents using Retrieval-Augmented Generation (RAG) to streamline healthcare data management. Built AI-based tools for medical research, real-time decision support, and patient assistance. Integrated Langchain, Pandas AI, Hugging Face, and Streamlit for intelligent querying, summarization of medical guidelines, and interactive AI chatbots to improve patient and medical staff engagement.

Prediction of Disease Outbreaks | *Python, Jupyter Notebook, ML models, Streamlit*

January 2025

- Built an AI/ML model to predict potential disease outbreaks using environmental, demographic, and healthcare data. Applied machine learning algorithms to identify patterns and high-risk zones, enabling early intervention. Focused on real-world data analysis and visualization to assist public health planning and response.

Weather Data Visualization | *Seaborn, Matplotlib*

October 2024

- Processed and visualized real-world weather datasets using Seaborn and Matplotlib to study patterns and correlations in temperature, humidity, and rainfall data for better forecasting insights.

Sentiment Analysis of Tweets | *NLTK*

November 2024

- Applied NLP techniques with libraries like NLTK and TextBlob to analyze and classify public sentiment on trending topics, providing actionable insights from social media data.

Movie Rating Analysis | *Pandas, Matplotlib*

September 2024

- Explored large datasets of movie ratings to identify user preferences, popular genres, and rating trends over time

Technical Skills

Languages: Python, C++, SQL

Developer Tools: VS Code, IntelliJ, Google Cloud Platform

Technologies/Frameworks: Langchain, RAG, Tensorflow, Kothlin

Extracurricular

Bangiya Sangeet Parishad

2013 - 2021

Ankan Ratna

Biswa Bharati

- Awarded "Ankan Ratna" certificate in Portrait Painting and Sketching from Biswa Bharati, recognizing artistic excellence and creativity.
- Published article on World Environment Day in Kharagpur College magazine, contributing to environmental awareness initiatives.
