Bangalore

EDUCATION

2016-2020

NATIONAL ENGINEERING
COLLEGE, KOVILPATTI

- B.E in Computer Science and Engineering - 7.45 / 10

2016 - HSC

AUPET CHINMAYA VIDYALAYA
MHSS, TIRUNELVELI

- 75.33 %

2014 - SSLC

AUPET CHINMAYA VIDYALAYA MHSS,
TIRUNELVELI

- 90.2 %

SKILLS AND TOOLS

- Manual Testing - Post silicon validation, Functional testing
- Data reporting and log analysis
- Bug analysis
- Tools : JIRA , Splunk
- Critical thinking

PROFILE

As a Computer Science Engineering graduate with over two years of professional experience in software engineering, including my role as a Software Engineer, I bring a solid foundation in testing and analysis domains. My hands-on experience, combined with a strong academic background, has equipped me to contribute effectively to real-world projects. I have been involved in end-to-end validation, manual testing, defect management, and close collaboration with stakeholders to ensure project goals are met efficiently. I am enthusiastic about working with cross-functional teams and leveraging technology to address complex business challenges. I am eager to continue growing professionally by contributing to impactful projects in dynamic and fast-paced environments

WORK EXPERIENCE

HARMAN

Software Engineer

Nov, 2022 - Oct, 2023

- Worked in data monitoring and analysis, leveraging tools like Power BI and Splunk to extract actionable insights and support strategic business decisions.
- Built and maintained telemetry data pipelines and dashboards in Splunk to proactively identify anomalies and recurring issues, helping streamline troubleshooting and enhance team visibility.
- Interpreted and worked with large, multi-source datasets, uncovering key patterns and translating findings into meaningful outcomes that directly supported project objectives.
- Applied statistical analysis and introductory machine learning techniques on complex data sets to surface trends, detect outliers, and contribute to performance optimization efforts.
- Developed custom Splunk applications to highlight misbehaving data signals and identify potential issues in system performance, contributing to faster root cause analysis.
- Also played a mentoring role by training new team members on how to use Splunk and Power BI effectively for data monitoring, visualization, and insight generation, helping cultivate a strong, data-aware team culture.

HARMAN

Associate Product Engineer

Aug, 2021 - Oct, 2022

- Post-Silicon Validation & Embedded Systems Test Engineer
- Experienced Test Engineer with 1.5+ years of hands-on involvement in post-silicon validation and embedded systems testing across multiple Intel platforms. Specialized in validating Connectivity (Wi-Fi, Bluetooth), Cellular Modems (5G/6G), GNSS, and Embedded Controller (EC) functionality in laptop and PC platforms.
- Executed sanity, regression, and performance testing on post-silicon hardware, ensuring seamless firmware and driver integration across real-time system environments.
- Conducted log analysis, issue triaging, and basic hardware/software debugging for EC-enabled SoC platforms, enhancing platform stability and validation efficiency.
- Strong exposure to silicon bring-up environments, validating connectivity modules and embedded components in pre-production and production-level silicon.
- Proficient in using tools for bug tracking, trace logging, and validation reporting; collaborated closely with development teams to drive faster issue resolution.
- Demonstrated strong knowledge in hardware-firmware interaction, especially in validating edge cases and low-level controller functionalities.
- Actively collaborated with cross-functional teams, ensuring delivery of detailed validation reports under tight project deadlines.
- Played a key role in supporting junior team members, maintaining high service standards, and fostering a collaborative, quality-driven work environment.

HOBBIES

- Badminton
- Cooking
- Riding cars

LANGUAGES

- English - *Full Professional Proficiency*
- Tamil - *Native Proficiency*
- Hindi - *Limited proficiency*

WORKSHOPS

- Attended three days Hands-on training on **"Programming for IOT"** .
- Undergone implant training on **"Application development in java"** in Phoenix Softech.
- Attended workshop on **"Ethical hacking"** at Madras institute of technology by ZOHO Developers.
- Undergone implant training on **"Web design using HTML, Javascript and PHP"** in ICore Technologies.

CERTIFICATIONS

- Completed Pre-Engineering program on "Java script and scratch" conducted by Department of Computer science, The University of Texas, Dallas at National Engineering college.
- Completed Linux training offered by Spoken tutorial project, IIT Bombay.
- Completed PHP ad MySQL training offered by Spoken tutorial project, IIT Bombay.
- Completed Python Training offered by Spoken tutorial project ,IIT Bombay.

PERSONAL INFORMATION

NAME : *Srimathi K*
FATHER'S NAME : *Kanthimathinathan C*
DOB : *06 Jan, 1999*
GENDER : *Female*
ADDRESS : *40A, Sorkavasal East street, CN Village,
Tirunelveli, Tamil Nadu - 627001*
PHONE : *+91 - 9444900511*
EMAIL : *srin.mathi99@gmail.com*
NATIONALITY : *Indian*
