Power BI Portfolio

PROFESSIONAL SUMMARY

Aspiring Data Analyst with hands-on experience in Python, SQL, Power BI, and Tableau. Skilled in designing automated dashboards, training ML models, and converting raw data into insights that improve decision-making. Built and deployed chatbot, sales dashboards, and prediction tools using real datasets and tools. Strong communication and collaboration abilities with a focus on practical business outcomes.

EDUCATION

Master of Computer Applications (MCA)	Aug 2023 – May 2025
Narula Institute of Technology, MAKAUT	CGPA: 8.29 / 10
Bachelor of Computer Applications (BCA)	Aug 2020 – Jul 2023
Guru Nanak Institute of Technology, MAKAUT	CGPA: 8.55 / 10
Higher Secondary (ISC, Commerce)	Mar 2020
Julien Day School, Kalyani	55%
Secondary (ICSE, Science)	Mar 2018
Julien Day School, Kalyani	61%

TECHNICAL SKILLS

Languages/Tools: Python, SQL, Power BI, Tableau, Excel, Flask, Git

Data Skills: Data Cleaning, Data Visualization, Dashboarding, Machine Learning, DAX

Productivity: MS Office, Google Workspace, PDF Tools

Other: Communication, Collaboration, Troubleshooting

PROJECTS

AI Shopping Chatbot (GPT-2, Flask) — GitHub

- Built a GPT-2 chatbot that handled 85% of customer queries for a mock e-commerce platform.
- Integrated chatbot via Flask REST API and added contextual logic, reducing failed query rate by 25%.
- Improved user response accuracy by 20% using fine-tuning and feedback loops.

Financial Sales Dashboard (Power BI) — Portfolio

- Developed a dynamic dashboard to monitor KPIs across 3 regions and 20+ product categories, improving decision-making speed by 30%.
- Reduced reporting time by 50% using DAX calculations, slicers, and drill-down views.
- Optimized dashboard load speed by 35% through query reduction and model efficiency.

Crime Prediction using Machine Learning — GitHub

- Built a logistic regression model that achieved 78% accuracy in predicting crime types using historical data across 1000+ records.
- Performed EDA and feature engineering to boost model accuracy by 25%.
- Visualized trends and hotspots for actionable law enforcement insights.

Excel Data Entry Automation — Portfolio

- Created 5+ automated dashboards using pivot tables and slicers, reducing manual data processing time by 40%.
- Improved reporting consistency by implementing data validation and formula-based flagging.
- Enabled instant performance monitoring through slicers and KPI visualizations.

CERTIFICATIONS

Business Intelligence Analyst – Udemy

Full Stack Web Development with Python Django – Ardent Computech Pvt. Ltd.

Advanced Data Analysis using Power BI – Webinar Participant, Koenig Solutions
