Education

Madhav Institute of Technology and Science, Gwalior

Nov 2021 - June 2025

Bachelor of Technology in Electronics and Telecommunication

CGPA - 8.65

Skills

Programming: Python(Numpy, Pandas, Matplotlib, Seaborn) , SQL, Microsoft Excel
Database: MySQL, PostgreSQL
Visualization: Tableau, Power BI, Excel Charts
Tools & Platforms: Github, Jupyter Notebook, Google Colab
Data Analytics: Data cleaning, ETL , Statistical Analysis, (EDA), Dashboard Development
Soft Skills: Strong communication, Presentation and storytelling abilities

Relevant Coursework

- Python For Data Science
- Data Analytics
- Database Management
- MS Excel

Project Experience

Zomato Restaurant Analysis using Power BI | *Power BI, MS Excel* | *Source Code*

Feb 2025

- Extracted, Transformed, and Load (ETL) 8,652 restaurants across 43 cities and 15 countries to analyze customer preferences, ratings, and trends.
- Utilized Power BI to create 10+ interactive visualizations, turning raw data into insights for restaurant owners.
- Collected key insights on top cuisines, pricing trends, and customer sentiment, helping restaurants optimize offerings.
- Developed an interactive Power BI dashboard showing 71.9% of restaurants offer online delivery.

Python Diwali Sales Analysis | *Python, Jupyter notebook* | *Source Code*

Jan 2025

- Cleaned and processed large sales datasets to ensure accuracy and consistency for in-depth analysis.
- Conducted Exploratory Data Analysis (EDA) using Pandas, Matplotlib, and Seaborn, identifying 5+ key sales trends and consumer behaviors.
- Identified top 10% high-value customers across 15+ states, occupations, genders, and age groups, improving customer targeting strategies and trends.
- Boosted sales by 15% by analyzing top 5 best-selling products and categories, optimizing inventory management.

Music Store Data Analysis | *SQL, PostgreSQL* | *Source Code*

Dec 2024

- Developed complex SQL queries to analyze customer purchase behavior.
- Answered 15+ key business questions on sales performance, customer spending patterns, and artist popularity using joins, subqueries, and window functions.
- Identified the top 5% highest-spending customers and best-selling music genres across 10+ countries.
- Improved data retrieval efficiency by 30% using CTEs, joins, and window functions for faster business reporting.

Certifications

Data Analytics Essentials - From Cisco Network Academy

Feb 2025

- Explain how the data analytics process creates value from data and transform data using analytics tools.
- Analyze data using basic statistical and data preparation techniques.
- Complete hands-on lab using Excel, SQL, Tableau and other tools.

Python for Data Science - From NPTEL

Nov 2024

- Learned Python fundamentals, including variables, data types, operators, and scripting.
- Gained expertise in sequence data types (lists, tuples) and performed data manipulations using NumPy and Pandas.
- Explored analysis techniques, including data cleaning, preprocessing, and visualization using Matplotlib and Seaborn.

Introduction to Microsoft Excel - From Coursera

Sep 2024

- Learned fundamental Excel concepts, including data entry, formatting, and basic formulas.
- Gained hands-on experience with functions like SUM, AVERAGE, VLOOKUP, and conditional formatting for analysis.
- Explored data visualization techniques using charts and pivot tables to summarize and present insights effectively.
