EDUCATION

Jatiya Kabi Bira Kishore govt. (degree) College

Bachelors in Commerce

May 2023

CGPA: 7.88

Jatiya Kabi Bira Kishore govt. H.S. SCH

HSC – Commerce

August 2020

Percentage: 79.17

LR DAV Public School

SSLC

May 2018

Percentage: 72.60

CORE COMPETENCY

- Business Analysis & Reporting.
- Knowledge on Agile waterfall methodology.
- Preparing Project Charter and creating software specification documents.
- Creating flow charts to represent flows and project architecture in tools like Draw.io and Lucid chart.
- Skilled in gathering and analysing complex business objective and create detailed reporting.
- Hands-on experience in drawing strategical insights.
- Dashboard Development (Power BI, Tableau, Looker)
- Excellent in Root cause analysis and problem-solving skills.
- Proficient in various MS Office components - MS Word, MS Excel, MS PowerPoint etc.
- Knowledge of DAX (Data Analysis Expressions) in Power BI.
- EDA, Data Cleaning, Analytical & Reporting Skill.
- Team player, creative and innovative.

SKILL SUMMARY

Project Management skills:	Requirement gathering, Research and analysis, Business and Data Analysis, Debugging, Structured communication, Project planning, Time management, Root cause analysis, Risk management, Presentation skills, Decision-making
Internet Tools:	MySQL Workbench, Jupyter Notebook, Spyder, Microsoft Power BI, MS Excel
Data Visualization & Modelling Tools:	Power BI, Tableau, draw.io, Lucidchart, Google's Looker studio, Metabase
Methodologies:	Knowledge on Agile, water flow methods
Programming Languages:	Python, SQL, Advanced Excel
Databases:	MySQL Workbench, Postgresql

PROJECTS

1. Internship Project on Apparel Retail Operations Analysis.

- Collected and analysed inventory and sales data to address inventory management issues.
- Provided insights to optimize inventory levels and improve demand forecasting.
- Developed real-time dashboards to visualize stock trends and performance.

2. Internship Project on Optimization of Solar Power Generation.

- Collected and cleaned data to address energy output fluctuations due to environmental and system inefficiencies
- Developed interactive dashboards to visualize energy trends and provide actionable insights for decision-making For the users.

3. Internship Project on Analysis of Bonus Allocation.

- Collected and analyzed the betting record and bonus distribution data for further analysis.
- Cleaned the data by following data preprocessing using both Python and MySQL to draw statistical and business insight.
- Helped the client in fair distribution of bonuses among its customers and came up with ways to encourage more to in future betting.

4. Internship Project on Optimization of Bus Scheduling and Fare Pricing

Analyzed bus operation data, performed data cleaning and preprocessing using Python and MySQL. Created dashboards in Power BI, Excel, and Google Looker to visualize operations and trends. Provided actionable insights to optimize fare pricing, improve schedule efficiency, and enhance customer satisfaction.

5. Research on a mini project about Optimization of unplanned machine downtime for a leading Fuel and pump manufacturing industry.

- Collected and analysed operational and downtime data to identify machine failure patterns.
- Developed predictive models to optimize maintenance schedules.

6. Developed real-time dashboards in Power BI, Excel, and Google's Looker Studio to visualize to monitor the trends of the projects for the users.

CERTIFICATION

- **Professional Program in Data Analytics - 360DigiTMG**

May-2025

Trained and certified in 4 real-time internship projects to hone my project managing and business development skills.

- **Advanced Excel, Data Visualization using Power BI, SQL for Data Analytics, Python Programming- 360DigiTMG**

Jan-2025

Gained proficiency in Business and data analysis tools and certification on each of these skills to enhance my skills to draw business insights and help in decision making.

TRAINING

- Professional Program on Data Analytics

Aug 2024 – May 2025
360DigiTMG, Hyderabad
