OBJECTIVE

Data Analyst with strong proficiency in Excel, Power BI, SQL, and Python, seeking to leverage data visualization and analytical skills to support data-driven business decisions. Experienced in developing interactive dashboards and reports through client and internship projects. Adept at collecting, cleaning, and validating complex datasets, and translating insights into actionable strategies that drive business growth.

SKILLS

-  **Tools**
Power BI, Advanced Excel, Git
-  **Data Handling**
Data cleaning, Data transformation, and Data validation
-  **Programming Languages**
SQL, Python (Pandas, NumPy, Matplotlib)
-  **Database Management**
MySQL, Power Query
-  **Data Visualization**
Dashboard creation, Trend analysis, Drill-through reports
-  **Soft Skills**
Adaptability, Problem-Solving, Team Collaboration, Analytical Thinking

EXPERIENCE

- 03/2025 - Present**
Pune
- Data Analyst Intern**
NMD Infotech
Internship
 - Utilized Excel, SQL, Power BI, and Python to analyze business data and deliver client-focused analytical solutions.
 - Collected, cleaned, and validated large datasets from multiple sources to ensure data accuracy and integrity.
 - Developed interactive Power BI dashboards to visualize key performance indicators (KPIs) including sales, revenue, profit, returns, and customer behavior.
 - Conducted data analysis to compare regional performance, evaluate product trends, and identify high-value customer segments.
 - Created customized reports and dashboards based on client requirements, improving data visibility and supporting data-driven decision-making.

EDUCATION

- 08/2020 - 06/2024**
Pune 43
- B.E. in Information Technology**
Savitribai Phule Pune University, Sinhgad Institute Of Technology And Science, Narhe
- 06/2018 - 05/2020**
Pune 38
- Higher Secondary**
Bharati Vidyapeeth's Yashwantrao Mohite College Of Science

PROJECTS

Airbnb Australia Dashboard | Ms Excel | Python | Power BI

- Developed a comprehensive dashboard for analyzing property listings and customer sentiments.
- Built an interactive Power BI dashboard to analyze 18,000+ property listings across Australia.
 - Visualized key metrics like total revenue (₹119 Cr+), host performance, room types, and regional trends.
 - Used Python to perform sentiment analysis on guest comments and Google Sheets for translating non-English reviews.
 - Enabled insights into customer satisfaction, top-earning hosts, and neighborhood revenue trends.

Banking Dashboard | Power BI

- Created a centralized dashboard to provide key insights on banking operations.
- Built an interactive dashboard to monitor ₹43M+ in loans, ₹26M+ in transactions, and 1000+ customers across multiple branches.
 - Enabled clear reporting on customer segmentation, KYC compliance, loan status, and branch performance to support data-driven decisions.
