Internships

- **GSoC (Google Summer of Code) contributor CCEXtractor** **May 2024 - Aug 2024**
 - Scalable URL shortener including authentication, confirmation email, dashboard for created URLs with metadata.
 - Worked with Vue, JavaScript, Typescript, Cloudflare Workers, Supabase, Mailgun, OAuth
 - Utilized software design, system design and serverless architecture to ensure efficiency with scalability.
- **Summer Intern Mphasis (Offline)** **June 2024 - July 2024**
 - Engineered and optimized drivers and controllers for servers on Linux using Python in robot frameworks and C in creating libraries.
 - Automated driver testing, reducing manual testing time by 30%.
 - Collaborated with cross-functional teams to improve driver reliability using JIRA
- **Research Intern RV University** **June 2023 - July 2024**
 - Active Learning Research improves dataset training, created 4 sampling methods using confidence and clustering.
 - Worked on Linux environment, MobileNet, DenseNet, VGG-16, ResNet-56, LeNet-5 models, CIFAR-10, CIFAR-100, SVHN datasets.
 - Writing a research paper for prestigious journals to publish our results.
- **Project Intern BroadrangeAI** **Oct 2023 - Dec 2023**
 - Dynamically transform website content (images and text) using generative AI.
 - Worked with Natural Language Processing, Neural Networks, OpenAI's API, DALL-E 3

Projects

- **Converting Image to Sketch using ML and DL** [GitHub](#)
 - transforms images into sketches using K-Means clustering, Autoencoders, Generative Adversarial Networks (GANs).
 - Achieved **MSE = 16.28, PSNR = 36.01, and SSIM = 0.9566**
 - Skills: Python, TensorFlow or PyTorch, Scikit-learn, NumPy, Pandas, OpenCV.
- **AI Stock Predictions & Analysis** [GitHub](#) | [Live Demo](#)
 - Developed a Flask web app that generates detailed stock analysis and **forecasts future prices with 90%+ model accuracy** using Facebook Prophet. Processes **10+ years of historical data, 20+ technical indicators**, and macroeconomic trends to create interactive HTML reports in under **5 seconds**.
 - Skills: Python, Flask, Time-Series Forecasting, Prophet, Data Visualization (Plotly), API Integration (yfinance, FRED), Technical Analysis, Feature Engineering, Deployment (Render).
- **Grafana-Myfitnesspal-dashboard** [GitHub](#)
 - Created a Flask-based web app that converts **CSV exports** from MyFitnessPal into a **SQL database** (via pandas and SQLAlchemy), and dynamically renders them as interactive **Grafana dashboards**. Supports seamless upload-to-chart flow in under **10 seconds** (CSV → SQL → Grafana).
 - Skills: Python (Flask, pandas, SQLAlchemy), MySQL, Data Visualization with Grafana, Web Development, API Integration, Rapid Prototyping.

Education

Narayana Olympiad School (Kasturi Nagar). 10th CBSE 90.2%	2019– 2020
Narayana College (Sahakar Nagar). 12th CBSE 82.2%	2021– 2022
RV University · B. Tech, Computer Science and Engineering CGPA: 9.4	2022– 2026

Technical Skills

Programming languages: C++, Python, C, JavaScript, Java.

Experience with: Software Design, Linux, Data Structures and Algorithms, System Design and Architecture, Operating Systems, DBMS, Computer Networks, OOPS, Natural Language Processing, Neural Networks, Generative AI, Machine Learning, Deep Learning, Pandas, Scikit-Learn, PyTorch, Mailgun, OAuth, spark, hadoop, map reduce, h base, json, elastic search, kafka, kubernetes, MongoDB, Cloudflare Workers, Agile Software Engineering Tools, and DevOps, Cloud Computing(AWS & GCP), PySpark, Power BI, Advanced SQL, Tableau, Looker, Excel, grafana.

Positions of Responsibility

- **Founder and President** · Callisto (Astronomy Club) **2022 – 2023**
 - Formed a club with 15 members and successfully hosted 5 events, each attended by an average of 100 people.
- **Core Member** · GDSC (Google Developer Student Club) of RVU **2023 – 2024**
 - Organized 6 successful events on Google technologies, responsible for student outreach as a Networking Lead.

Achievements

- **HackerRank** - 6 stars gold category in data structures and algorithms. **2023**
- **GSoC'24 @CCEXtractor** - Contributor, selected in 1220 out of 43,984 **2024**
- **Hackathons** - Participated in CodHer Hackathon and Google Gen AI Hackathon **2024**
