SUMMARY

Analytical thinker with engineering roots and a data-obsessed mindset, aiming to drive smarter business decisions. Hands-on experiences with Python, SQL, Power BI, and Excel — not just to run queries or draw charts, but to uncover patterns that executives actually care about. Completed industry-grade bootcamp and built real projects that mirror workplace challenges — from predicting customer behavior to analyzing brand sentiment. My strength lies in translating complex insights into simple visuals and product-impact stories.

EDUCATION

Hof University of Applied Sciences, Germany

Sep 2021 - Sep 2024

B.E Innovative Textiles | CGPA: 2.2 (European Grade System)

PROJECTS

Course Purchase Prediction | [Link](#)

- Built and deployed a machine learning model to predict course purchase likelihood — enabling targeted marketing strategies.
- Benchmarked 5 algorithms (LogReg, KNN, SVM, Decision Trees, Random Forest) and selected the top-performing model based on business-aligned metrics like F1-score.
- Addressed class imbalance with real-world metrics focus, ensuring the model was not just accurate, but actionable.

Twitter Engagement Analysis for CommBank | [Link](#)

Virtual internship simulation via Forage

- Analyzed tweet-level engagement drivers, uncovering how timing, tone, and content structure influence user interaction.
- Mapped sentiment shifts in replies and quotes to surface subtle PR risks and amplify recurring brand strengths.
- Delivered executive-style insights, simulating real-world client delivery through clear, business-relevant reporting.

SKILLS

Data Analysis & Modeling:

- Advanced Excel
- Python (NumPy, Pandas, Scikit-learn)
- Supervised & Unsupervised ML Techniques

Data Visualization:

- Power BI
- Python (Matplotlib, Seaborn)

Databases & Version Control:

- MySQL
- Microsoft SQL Server
- Git & GitHub

CERTIFICATIONS

Excel for Business Intelligence | [Codebasics](#)

Git and GitHub for Data Professionals | [365 Data Science](#)

The Complete Data Science Bootcamp | [Udemy](#)

Power BI for Data Analysis | [Codebasics](#)
