## PROJECTS

### Agriculture Monitoring and Cure System

[Python]

📅 [Link to Website](#)                      📍 [GitHub Link](#)

Developed a **Smart IoT-based Agriculture Monitoring System** using **Raspberry Pi 4** for **real-time crop monitoring** and **disease detection**. Integrated **automated precision spraying** to enhance **productivity** and **resource efficiency**.

### Data Cleaning

[MySQL]

📅 [Link to Website](#)                      📍 [GitHub Link](#)

Developed a **MySQL Data Cleaning** project for **missing data, duplicates, and inconsistencies**. Applied **normalization, outlier detection, and CRUD operations**. Enhanced **data integrity and optimization**.

### Exploratory Data Analysis

[MySQL]

📅 [Link to Website](#)                      📍 [GitHub Link](#)

Developed an **Exploratory Data Analysis Project** using **MySQL**, leveraging **JOINS, subqueries, and aggregate functions** to extract **insights** and identify **patterns**. Focused on **data-driven decision-making** and **business intelligence**.

### AutoCryptoAPI

[Python]

📅 [Link to Website](#)                      📍 [GitHub Link](#)

Developed a **Python-based Crypto Data Automation** system using the **CoinMarketCap API** for **real-time tracking**. Stored data in **CSV**, leveraging **pandas, matplotlib, and seaborn** for **processing and visualization**. Features **scheduled execution, trend analysis, and scope for AI-driven insights**.

### Automatic File Sorter in File Explorer

[Python]

📅 [Link to Website](#)                      📍 [GitHub Link](#)

Developed a **Python-based File Sorter** using **os** and **shutil** for **automated file organization**. Categorizes **CSV, images, text, and Excel files**, ensuring **efficient storage and management**.

### Movie Correlations Analysis

[Python]

📅 [Link to Website](#)                      📍 [GitHub Link](#)

Developed a **Movie Correlation Analysis** using **Python, pandas, seaborn, and matplotlib**. Analyzed **budget, earnings, votes** with **statistical correlations** to reveal **key revenue drivers**.

## SKILLS

### Programming

Java, Python, MySQL, JavaScript

### Data Analysis

Data Cleaning, Exploratory Data Analysis, Statistical Analysis

### Data and BI Tools

Power BI, Tableau, Matplotlib, Seaborn, Matplotlib, Excel

### Business Analysis Tools

JIRA, Agile Methodologies, Wireframing (Basic)

### Tools and Environments

Version Control (Git, GitHub), MS Excel, Data Manipulation

## ACHIEVEMENTS

### Recognition at 4th International conference(E2A)

📅 [Certificate Link](#)

Presented a research paper on **"Design and Implementation of an IoT-Based Aerial Agriculture Monitoring System"** at **\*E2A-2024**, organized by **\*\*NIT Silchar\*** from **\*December 9-11, 2024\***. The paper focused on leveraging IoT for aerial monitoring in smart agriculture.

## ACADEMICS

### B.Tech (Computer Science and Engineering)

Institute of Technical Education and Research

📅 2021-24                      📍 7.91 CGPA

### Diploma In Computer Science

CV Raman Polytechnic, Bhubaneswar

📅 2018-21                      📍 78%

## CODING PROFILES

### CodeChef

Solved 100+ Questions

### LeetCode

Solved 100+ Questions

### HackerRank

Solved 100+ Questions
