EDUCATION

Bengal Institute of Technology

Jun 2021 – Jun 2025

Bachelor of Technology in Electronics and Communication & Engineering, CGPA: 7.85

EXPERIENCE

React JS Intern: CYPHERX

Feb 2023 – Mar 2023

- Managed a complex React.js codebase, enhancing code readability and efficiency by 15% while expanding skills and understanding through hands-on experience
- Implemented responsive design using React.js and CSS frameworks, ensuring compatibility across devices and improving mobile usability
- Optimized React application performance by identifying and resolving bottlenecks, leading to a 20% improvement in load times and user experience

AICTE Intern: IBM

Jan 2023 – Feb 2023

- Gained proficiency in TensorFlow and Keras by implementing machine learning projects, applying frameworks to build and train neural network models
- Facilitated the end-to-end machine learning workflow, including data cleaning, model training, and evaluation, contributing to 12% of the overall project improvements
- Explored neural network architectures using Keras, enhancing the model's predictive capabilities on test datasets

Full-Stack Developer Intern: DevTown

Jun 2022 – Nov 2022

- Facilitated the development of full-stack applications using the MERN stack, increasing overall project completion by 20% through effective coding practices
- Coordinated with the integration of secure authentication systems using JWT, strengthening application security and user authentication processes
- Enhanced code for RESTful APIs, reducing API response times and improving overall application performance

SKILLS

- | | | | | |
|--------------|----------------|--------------|--------------|-----------|
| • HTML | • Python | • TypeScript | • GCP | • VS Code |
| • CSS | • React.js | • Next.js | • AWS | • Postman |
| • JavaScript | • Redux | • Node.js | • SDLC | • SQL |
| • Java | • Restful APIs | • Express.js | • Git/GitHub | • MongoDB |

PROJECTS

Book Record Management

Oct 2022 – Dec 2022

- Designed and implemented a book record management API using Node.js and Express, handling book records and supporting simultaneous user requests
- Integrated MongoDB for data storage, improving record management and query performance and scaling the system and accommodated 500+ book records

Food Flow

Jul 2022 – Sep 2022

- Developed a food delivery app with the MERN stack, implementing 6 core screens including Home, My Orders, Cart, Login, and Logout, Payment Processing, increasing app functionality
- Integrated key features such as order placement, real time order tracking, and reviews, achieving a 25% enhancement in operational efficiency and improving order management

CERTIFICATIONS

- Postman API Fundamentals Student Expert Certification from [Postman](#) Jun 2023
- Outstanding Performance in Coding Test, AlgoHunt by [NoobCode](#) Jun 2023

ACHIEVEMENTS

- Achieved a maximum rating of 1640 on [LeetCode](#) and attained a global rank of 577 in a [CodeChef Contest](#)
- Secured 1st place in AlgoHunt [HackerRank Contest](#) & 3-star with highest rating of 1670 on [CodeChef Contest](#)

EXTRA-CURRICULAR ACTIVITIES

- Managed project contributions, resolved bugs, & ensured code quality for [Social Winter of Code](#) by Social India
- Added features in GirlScript Summer of Code, boosting visitors and code quality conducted by [GirlScript Foundation](#)
