Summary

Seeking a position where I can use my analytical skills and experience to drive actionable insights and contribute to organizational success. I am dedicated to leveraging data for informed decision-making and continuous improvement within a collaborative team environment.

Education

College of IT and Management Education, Bhubaneswar (MCA)

2022 – 2024

MCA- Computer Applications

Ispat Autonomous College, Rourkela (Bsc)

2018 – 2021

BSc- Chemistry Hons.

Technical Skills

Database: Data Warehouse

Programming: SQL, Python

Analytics: Advance Excel, Power BI, Data Visualization, DAX, M-Query, Machine Learning

Professional Experience

Rubixe

Nov 2024 – May 2025

Data Analyst Consultant

Bangalore,

Karnataka

- Conducted customer segmentation using clustering to support targeted marketing and retention.
- Analyzed IMDB data to uncover trends in ratings, genres, and revenues for content insights.
- Evaluated supply chain data to identify bottlenecks and enhance logistics and inventory planning.
- Created dashboards and reports in Power BI and Excel to deliver insights to key stakeholders.

Projects

Supply Chain Analysis | Power BI, SQL

May 2025

- **Data Gathering** – Gathered the inventory and logistics data from the database to Power BI.
- **Data Reporting** - Designed and implemented a structured reporting framework to monitor key supply chain KPIs to track daily, weekly, monthly fulfillment rate, inventory turnover, and delivery timelines, enabling timely and data-driven decision-making.
- **Data Validation** - Ensured data accuracy by applying DAX formulas for cross-verification in Power BI and performing manual checks in SQL to align data across departments.
- **Visualization End to End** – Created an interactive Power BI dashboard to visualize supply chain metrics in real time, facilitating quick access to insights like stock availability, supplier performance, and shipping efficiency for stakeholders and management.

IMDB Movies Analysis | SQL , Power BI

Mar 2025 – Apr 2025

- **Data Gathering** – Gathered the data from IMDB database to SQL for a detailed comprehensive analysis.
- **Data Modeling** – SQL queries, subqueries, joins were used for the required calculations.
- **Visualization End to End** – Exported query results to Power BI and developed an interactive dashboard using advanced visual to understand the key trends in the entertainment domain.

Customer Segmentation Analysis | Advance Excel, Power BI, SQL

Jan 2025 – Feb 2025

- **Data Gathering** – Collected customer related data from internal databases to build a holistic customer profile dataset.
- **Data Modelling** - Created relationships between the table using primary key and Foreign Key.
- **Data Validation**- Validated data using SQL by handling missing values, removing duplicates, and standardizing formats to ensure accuracy in clustering outcomes and data-driven decisions.
- **Visualization End to End**- Created Advanced Visual for the Analysis to show different attributes of the customer analysis.

Declaration

I hereby declare that the details furnished above are true to the best of my knowledge.

Yours Sincerely,

Sweta Padhee
