

TANISH ASHTEKAR

Aspiring Data Science Associate

Address: Currently living in Pune, native Belgaum | **Mobile no. :** +91 7618711403

Digital Profile: [LinkedIn](#) , [GitHub](#) | **Email:** tanishashtekar@gmail.com

PROFILE SUMMARY:

I am an enthusiastic graduate with a strong passion for data science and a clear goal of becoming a skilled Data Science Associate I eagerly pursue opportunities to apply analytical skills in the realms of finance, e-commerce, and business while possessing a solid foundation in data manipulation, statistical analysis, and visualization, along with a deep understanding of industry tools and techniques. Committed to continuous learning and growth in the field of data science to contribute meaningfully to data-driven decision-making.

SKILLS:

- | | | |
|---------------------|---------------------|---------------------|
| • Python | • AWS | • Leadership |
| • MySQL | • Advanced MS Excel | • Communication |
| • PowerBI / Tableau | • Word / PowerPoint | • Critical thinking |
| • AI/ML | • Data Analysis | • Problem-Solving |

EDUCATION:

2021 - 2024 | Symbiosis Skill and Professional University

Bachelor of Science - Data Science - 8.0 CGPA

2019 - 2021 | Govindram Seksaria Science College

Pre-University - Science - 76.33%

2009 - 2019 | Dnyan Prabodhan Mandir

10 - 72.32%

INTERSHIPS:

Aspireit

AI Developer Intern | 26 October 2024 - 31 March 2025

- Developed and optimized models by integrating LLM APIs and designing prompts to achieve desired outputs.
- Assisted in fine-tuning LLMs for improved performance through iterative experimentation.
- Conducted model testing to identify edge cases and enhance robustness across diverse inputs
- Collaborated with the full-stack team to seamlessly integrate AI models into the application

Verolt Technologies Pvt. Ltd.

Trainee (Data Engineer Role) | 1 February 2024 - 31 July 2024

- Completed comprehensive training in data science and its various domains.
- Contributed to an ongoing company project, assisting mentors in its development and implementation.
- Undertook two personal projects, developing end-to-end applications based on provided problem statements and datasets.

Nubax Data Labs.

Data Science Associate Intern | 19 June 2023 - 11 August 2023

- Understanding the project, data, and the requirements of the client from the project
- Giving insights by doing the analysis using Python & PostgreSQL as per requirement
- Giving data-driven solutions on the use cases of the project and working on the technical implementation of the solution

Abhishek Alloys Pvt Ltd.

Data Analyst Intern | 19 May 2022 - 15 July 2022

- Collecting the data for entering of the data for daily production into the company's software
- Analyze the data and give the output based on the requirements of the company

PROJECTS:

Retail Redefined

Marva.AI LLP | 19 June 2023 - 11 August 2023

- The "Retail Redefined" an end-to-end project focuses on using smart technology to enhance retail operations by analyzing customer behavior and optimizing product placement.
- "Retail Redefined" aims to help retailers run stores better using clever technology and data insights.
- I assumed the dual role of Team Coordinator and Solution Architect

CineSage: Your Personal Movie Recommender!

Verolt Technologies Pvt. Ltd | 17 April 2024 - 17 May 2024

- "CineSage" an end-to-end project revolutionizes movie recommendations by leveraging sophisticated algorithms and user-centric design for a better user experience.
- Acquired expertise in movie industry dynamics, advanced ML algorithms, and data analysis.

Verolt Event Management

Verolt Technologies Pvt. Ltd | 17 April 2024 - 20 July 2024

- Developed the "Verolt Event Management" platform to enhance the event experience for attendees, exhibitors, and organizers.
- Implemented a Stall recommendation system to suggest stalls based on attendees' preferences, interests, and dynamic event calendars for efficient event scheduling and management.

ViDrive

Verolt Technologies Pvt. Ltd | 10 June 2024 - 22 July, 2024

- ViDrive is an end-to-end project that provides a platform for driver distraction detection and provides services like image, video, and live detection through user input
- Acquired expertise in Automobile industry dynamics, advanced CNN algorithms, data analysis, and Frontend

GPT-3 Sentiment Analysis

Self Project | 1 October 2024 - 14 October 2024

- Developed a GPT-3-powered CLI and Flask web app with sentiment analysis (Positive, Negative, Neutral), while storing interactions in MySQL.
- Added sentiment report generation with pie chart visualization, enabling seamless Docker deployment

Language learning Bot

Self Project | 1 March 2025 - 15 March 2025

- Built an AI language chatbot with GPT-4 and LangChain for scene-based, real-time conversations.
- Integrated mistake tracking and grammar correction using SQLite for adaptive learning.

CERTIFICATIONS:

- Excel skills for business (Coursera) - Essential by Macquarie University
- Excel skills for business (Coursera) - Intermediate 1 by Macquarie University
- Data analytics specialization (Coursera) - by Google (6 of 8 completed ongoing)
- Anekdoting Data - workshop on Data visualization by SSPU
- Architecting Solutions on AWS (Coursera)- by AWS
