Academic Details

**Bachelor of Technology (B.Tech.)
Electronics & Computer Engineering**
MIT, Chh. Sambhajinagar-2026 Batch
CGPA: **8.47**

12th HSC (SCI)-2020-2021
From Gorksha Vidhyalay Khamgaon ,
Grade in %: **90.33%**

10th SSC (semi-eng) : 2018-2019
Shri Sant Savta Gurukul Phulambri ,
Grade in %: **80.60%**

Technical Skills

**Programming Languages
| dev Tools:**

Java, Python, C, JavaScript |
HTML, CSS, JS, Figma(MERN)

Libraries/Frameworks:
React.js, Next.js, Bootstrap and
Tailwind.css

Data Visualization Tools:
PowerBI | python | Tableau | MS Excel

Soft Skills

Problem-Solving
Teamwork & Collaboration
Communication
Adaptability
Critical Thinking

Skilled In

Frontend Development:

Proficient in **Figma, HTML, CSS, and JavaScript**.
Experienced with libraries and frameworks like
React.js, Next.js, Bootstrap, Tailwind.css.

Backend Development:

skills in **backend** development technologies (**Node.js, Express.js, MongoDB, Firebase, Python**).

Data Science / Analytics :

Knowledge python libraries for data analysis and **visualization**, Including
NumPy and **Seaborn**.
Hands-on experience with data visualization and business intelligence tools -
Power BI and **Tableau** (with many Reports/Dashboards)
Proficient in data manipulation and analysis using **MS Excel**.

Projects :

Student Attendance System (Face Detection) Jun 2023-AUG 2023

Technologies : OpenCV (Python), Dlib (Python), MySQL, Tkinter.

Developed an automated attendance system using face detection and recognition technologies.

Tech Stack: Python (OpenCV, Haarcascade, Dlib), MySQL, Tkinter .

Features: Real-time face detection, facial recognition, and secure database management.

Impact: Streamlined attendance recording, reducing manual errors and increasing efficiency.

AI-Fake News Detector

Nov 2024 –Feb 2025

Built a web app to detect fake news

Frontend: React.js | **Backend:** Flask (Python)

Integrated **transformer models, NLTK**, and **scikit-learn** for text classification

Used **BeautifulSoup** for web scraping contextual data

Firebase for user authentication and database

Nestora : Rental Rooms/Flats and Mess System

Jan 2025 –Mai 2025

Frontend: React.js | **Backend:** Flask (Python) | **Database:** Firebase

Features include property listing, booking, mess registration, and user authentication

Enabled seamless communication between renters, owners, and mess managers

Dynamic Job Portal (group Project)

Dec 2023-Apr 2025

Tech Stack: PHP, Laravel, Xampp

Responsive design ensuring compatibility across devices.

Implemented **by Laravel, AMPP, Bootstrap, MySQL, Blade Templatin**

Achievements and Experience
