OBJECTIVE

Recent Information Science graduate passionate about turning data into actionable insights. Experienced in building dashboards and predictiv. Seeking a Business Analyst role to drive actionable insights and support data-informed decision- making in a dynamic organization.

EDUCATION

Bachelor of Engineering in Information Science

Rajeev Institute of Technology | 2020 - 2024 | CGPA: 7.9

Pre-University Course - Masters PU College | 2018 - 2020 | 84%

TECHNICAL SKILLS

- SQL & Databases: SQL, MySQL – proficient in queries, joins, subqueries, and data extraction.
- Excel: Advanced formulas (VLOOKUP, INDEX/MATCH), pivot tables, charts, VBA basics.
- Python: Data analysis using Pandas, NumPy, visualization with Matplotlib & Seaborn.
- Dashboarding Tools: Power BI (DAX, KPIs, slicers, filters), Tableau basics.
- Reporting & Automation: Python for automating reports & generating insights.
- Soft Skills: Analytical reasoning, problem-solving, communication, and stakeholder collaboration.

EXPERIENCE

Virtual Analyst - Accenture North America (Oct 2024)

- Analyzed 7 datasets to derive insights on social media content trends.
- Created impactful presentations to advise stakeholders.
- Improved data storytelling with visualization & strategic recommendations.

Virtual Analyst - PwC Switzerland (Nov 2024)

- Built insightful dashboards tailored to client KPI needs.
- Communicated findings effectively via client-ready emails and reports.

Virtual Analyst - British Airways (Jan 2025)

- Scraped and analyzed customer reviews to identify key behavior patterns.
- Developed a predictive model to forecast purchasing behavior.

Virtual Analyst - Tata Consultancy Services (Feb 2025)

- Designed actionable visuals and executive-level insights using simulated business datasets.

PROJECTS

Sales Data Dashboard - Power BI & SQL

- Built interactive dashboards to track performance across regions/products.
- Identified high-demand categories, improving business decision-making.
- Used DAX to calculate revenue trends and profitability metrics.

House Price Prediction - Machine Learning

- Applied regression models to predict property prices using historical datasets.
- Evaluated accuracy using MAE and R² metrics to improve performance.
- Enabled real estate players to forecast prices with data-backed confidence.

CERTIFICATION

- Data Analytics, by Great Learning.
- Fundamentals of Data Analytics, by Seventh Sense and NASSCOM.
- Databases for Developers by Oracle Corporation.
