Professional Summary

A dynamic professional with a strong foundation in software application support, business analysis, data analytics, and project implementation, gained through extensive work with prestigious clients such as the Ministry of Railways and the National Informatics Centre. Currently transitioning into a Data Science role with a focus on Decision Science, supported by an MBA in Business Analytics, hands-on training in Python, Power BI, and cloud-based tools. Inventor of a patented healthcare EHR system. Seeking to apply a combination of domain knowledge, analytics, and innovation to solve business problems at scale.

Skills

- **Technical:** MS Excel, MySQL, Power BI, Python, R Programming, Artificial Intelligence & Machine Learning,
- **Communication:** Data Storytelling, Presentation Skill, Written & Verbal Communication
- **Leadership:** Collaboration, Delegation, Mentoring, Team Building
- **Business Analysis:** Business Intelligence, Process Modeling, Requirement Gathering, Stakeholder Management
- **Analytical:** Data Cleaning, Data Visualization, Data Modeling, Exploratory Data Analysis, Statistical Analysis, Hypothesis Testing, Linear Regression, Random Forest, Decision Tree, Matplotlib, dplyr, tidyverse Problem-Solving.

Work Experience

JAN 2019 – AUG 2022

Business Analyst | National Informatics Centre, Vendor: Velocis Systems Pvt. Ltd. | New Delhi, India

- Performed **exploratory data analysis (EDA)** on over 500,000 electronic documents processed annually by the eOffice system, identifying key **performance indicators** such as document approval time and inter-departmental response rates.
- **Visualized trends** such as the volume of submissions, response time, and task completion rates across government departments, to identify areas of improvement.
- **Prepared reports and presentations** for government senior management, highlighting **performance improvements**, with a 15% reduction in document approval time within the first three months after implementing changes, including key insights into system performance, user adoption rates, and areas where the eOffice system could be optimized.
- **Identified inefficiencies** in the reporting process that delayed decision-making and recommended **process automation** through eOffice.
- **Continuously monitored the progress** of eOffice **implementation across departments, identifying any delays or obstacles in adoption.**
- Drafted **strategic implementation roadmaps aligned with government objectives**, including **transparency, digitization**, and citizen-centric governance.
- **Collaborated** with stakeholders to define **system requirements, translating business needs** into technical specifications for development teams.
- **Ensured legal and regulatory compliance** in the design and deployment of eOffice functionalities across departments.

JAN 2018 – JAN 2019

Software Support | Ministry Of Railways, Vendor: SISL Infotech Pvt Ltd | New Delhi, India

- Delivered **technical support** for key e-Governance platforms such as eOffice, SPARROW, and internal railway web applications, ensuring **seamless system functionality**.
- Conducted **end-user training sessions** as Master Trainer at DFCCIL, covering modules like File Management, Employee Master Details, and Knowledge Management System.
- **Collaborated** with clients to **gather and analyze requirements**, contributing to functional understanding and solution alignment.
- Managed **defect lifecycle** including **logging, prioritization, tracking, and re-testing** to ensure timely issue resolution.
- Prepared detailed **Daily and Weekly Status Reports** to track project milestones and communicate progress with stakeholders.
- Maintained **strong client relationships** by consistently delivering **high-quality support** and adhering to **service-level commitments**.
- **Interpreted and reviewed functional and technical design documents** to validate compliance with solution expectations and business goals.
- Attending **Refinement sessions** and **daily stand-up calls**.

Internship

JULY 2023- SEP 2023

Data Mining Intern | Triedge | Delhi, India

- **Collected, cleaned, and preprocessed** telecom voice quality datasets for analysis.
- Conducted **sentiment and pattern analysis** using R, identifying key factors affecting voice quality.
- Utilized **box plots, pie charts, and bar charts** in R to **visualize distribution, category-wise trends, and comparisons**.
- **Explored relationships between** call drop rate, user satisfaction, and geographic region to generate actionable insights.
- **Prepared reports, summarizing findings and presented data-driven recommendations** to the internal analytics team.

Projects

Telecom Voice Quality Sentiment Analysis (Internship)

- Conducted sentiment analysis using R on customer feedback related to telecom voice quality.
- Identified patterns affecting voice quality by analyzing call drop and satisfaction rates by region.
- Tools: R, ggplot2, dplyr, tidyverse.

Education

M.B.A. Business Analytics | Dr. APJ Abdul Kalam Technical University | Ghaziabad, Uttar Pradesh, India

B.E. Electrical | Rashtrasant Tukadoji Maharaj Nagpur University | Nagpur, Maharashtra, India.

Patent

Title: System for Enhanced Data Security

Date Issued: September 29, 2023

Inventor: THOMAS J. GEORGE

Mentors: Ajay Tripathi, Surbhi Kansal

Abstract: The present invention relates to innovative technology solutions for healthcare organizations, particularly in the field of electronic health records (EHR) systems. The invention aims to improve patient care, reduce costs, and enhance operational efficiency within healthcare facilities. The system for healthcare facilities, includes cutting-edge electronic health records (EHR) systems designed to streamline workflows, reduce errors, and improve communication between healthcare providers, the latest privacy and security module to ensure the confidentiality and integrity of patient data within the EHR system, and a range of modules for services, including training, technical support, and customization, provided to healthcare organizations to fully leverage the EHR technology.

Achievements

- Published Patent on 29th Sep 2023.
- Letter Of Recommendation from the Government Of India
- Represented National Level presentation at Madhav Institute of Technology & Science, Gwalior
- Hosted an international conference at Jaipuria Institute of Management, demonstrating strong organizational and leadership skills
