PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with hands-on experience in Power BI, SQL, and Databricks. Skilled at building automated data pipelines and delivering insights through dashboards and analytics. Strong foundation in data modeling, prompt engineering for LLMs, and cross-functional collaboration across engineering and HR teams.

EDUCATION

Master of Computer Applications (MCA)

Nov 2022 – Jun 2024

Dr. D.Y. Patil Institute of Management and Research, Pune

CGPA: 7.71 / 10

WORK EXPERIENCE

Data Analyst, 64Squares LLC, Pune

Sep 2024 – Present

- Built and maintained interactive Power BI dashboards to monitor system performance metrics (CPU, memory, disk usage) across 100+ virtual machines.
- Integrated Excel-based logs and Snowflake warehouse using SQL pipelines to deliver real-time infrastructure health analytics.
- Automated cloud billing analytics and forecasting models across Azure and AWS, helping reduce monthly spend by 22%.
- Collaborated with DevOps and engineering teams to build anomaly detection views and optimize reporting latency.

Data Analyst Intern, 64Squares LLC, Pune

Mar 2024 – Sep 2024

- Developed KPI dashboards using Power BI and SQL to track resource utilization and cost trends.
- Wrote SQL scripts in Snowflake for log normalization and service-wise cost aggregation.
- Assisted in designing metadata tracking for Power BI datasets integrated with GPT-based tools.

Technical Recruitment & HR Support, 64Squares LLC, Pune

Mar 2024 – Present

- Screened resumes, scheduled interviews, and administered technical assessments.
- Maintained the applicant tracking system and tracked hiring pipelines using internal dashboards.
- Generated weekly hiring metrics and supported onboarding documentation workflows.
- Partnered with hiring managers to identify ideal candidate profiles for tech roles.

PROJECTS

Power BI Interactive Reader & OpenAI Analyzer: Python tool integrating ADOMD.NET and GPT-4 to extract metadata and generate insights using a Gradio UI.

System Resource Utilization & Performance Monitoring Dashboard

Tools: Power BI, SQL, Snowflake, Excel

Developed an end-to-end analytics solution to track system health metrics (CPU, memory, disk usage) across 100+ virtual machines. Ingested raw logs from Excel and system APIs into Snowflake using SQL-based transformations. Built Power BI dashboards with real-time insights, anomaly detection, and drilldowns. Enabled DevOps teams to reduce downtime by 30%.

Cloud Cost Optimization & Usage Analytics Platform

Tools: Power BI, Excel, SQL, Snowflake

Created a unified dashboard for analyzing Azure & AWS usage patterns and cost spikes. Loaded billing data from Excel and APIs into Snowflake, performed SQL-based cost aggregation by services/projects. Power BI dashboards revealed underutilized resources and forecasting trends, helping the team cut cloud expenses by 22%.

CERTIFICATIONS

- SnowPro Advanced: Data Analyst — Snowflake
- SnowPro Core Certification — Snowflake
- Learning Data Analytics: Foundations — LinkedIn
- Project Management — Great Learning
- Databricks Certified Data Engineer Associate — Databricks

SKILLS

Languages & Tools:

- Python, SQL, Excel, Power BI, Tableau, MySQL, Snowflake, Databricks

Frameworks:

- Pandas, NumPy

Platforms:

- VS Code, Jupyter Notebook

Core Skills:

- Data Cleaning & Preparation, KPI Reporting, Dashboard Building
- Technical Screening, Interview Coordination, ATS Management
- Communication, Problem Solving, Collaboration
