

Trinadh Singampalli

I am extremely enthusiastic and passionate about working on real-world projects and contributing to an organization's goals. I possess the ability to quickly learn and adapt to new technologies that are essential for the organization's success. I am committed to actively participating and giving my best alongside the team

Address: Visakhapatnam, Andhrapradesh-531034 **Mobile:** (+91)8688428389

EDUCATION

Sardar Vallabhbhai National Institute of Technology	Surat, Gujarat, India
M.Tech in Information Security and Privacy(Computer Science) CGPA : 7.78	2023-2025
Guru Ghasidas Vishwavidyalaya	Bilaspur, Chhattisgarh, India
B.Tech in Information Technology CGPA : 8.25	2019-2023
Sri Chaitanya Junior Kalasala	Visakhapatnam, Andhra Pradesh, India
11th 12th class (Science stream) Marks: 960/1000	2016-2018
Mahathi High School	Visakhapatnam, Andhra Pradesh, India
10th class CGPA: 9.3	2015-2016

RESEARCH DETAILS

Analysis of Bitcoin Stability when Transaction Fee is only Reward	July 2024- June 2025
- Analysed Bitcoin's economic and network stability in a fee-only reward model (no block subsidy). - Simulated miner behaviour and profitability under varying transaction fee structures using C++. - Assessed impacts on mining incentives, network security, and transaction confirmation delays. - Proposed mitigation strategies to address risks of centralization and reduced participation.	
Skills: Blockchain, Cryptography, C++,Excel, Data Analysis,Bitcoin Architecutre	

PROJECT DETAILS

Facial Detection using CNN	August 2023- October 2023
- Developed a deepfake detection system using transfer learning with pre-trained CNN models (MesoNet, MesoInception4). - Analyzed facial features and movements to identify video forgery and tampering. - Implemented a pipeline for automated video authenticity verification using facial behavior analysis.	
Skills: Convolutional Neural Networks (CNN)	

Plant leaf Disease Detection	January 2023-March 2023
- Designed and trained a CNN model in Python to classify plant leaf diseases using image data. - Utilized deep learning frameworks (e.g., TensorFlow/Keras) for high-precision disease identification. - Aimed to enable early diagnosis and improve agricultural crop management through image-based classification.	
Skills: Python, CNN algorithm.	

SKILLS

- Programming Languages:** C++, C, Python, Machine Learning ,Blockchain, Cryptography
- Database:** SQL
- Tools:** Wireshark, Network Scanner

CERTIFICATIONS

- Social Network Analysis-Certificate |[NPTEL](#)
- Cyber Security and Privacy -Certificate |[NPTEL](#)

ADDITIONAL INFORMATION

- Gate CSE Score:** 329 (year: 2023)
- Languages:** English, Telugu, Hindi
