Projects

Converzia | Python, Streamlit, Gemini API, HubSpot, Brevo

GitHub

- Built an AI agent that secured an \$800 client and achieved a 70% email open rate via automated outreach.
- Developed an interactive web interface using Streamlit in Python to ensure smooth user experience.
- Integrated web scraping with GPT-4 using BeautifulSoup, Gemini API, and Brevo to generate personalized emails and managed customer data using HubSpot CRM.

Splitr | Next.js, React, Convex, Clerk, Inngest, Resend

Project link | GitHub

- Built a platform to track, split, and settle group expenses among users.
- Designed frontend using Next.js, React, and Shadcn UI with Gemini API integration for insights.
- Automated background jobs and payment reminders using Inngest and handled transactional emails with Resend.
- Implemented real-time APIs and serverless data storage using Convex along with secure authentication via Clerk.

CAC-Optimizer | MERN, Tailwind CSS, JWT, ML (Random Forest), Meta and Google APIs

Project link | GitHub

- Optimized Customer Acquisition Cost, boosting ad performance by 80% and cutting agency expenses by 20%
- Implemented secure role-based access using JWT authentication for both admins and employees.
- Used Random Forest for ad budget optimization and integrated Meta and Google Ads APIs with a Flask backend.
