Python (Pandas, NumPy, Seaborn)

Tools – VS Code, Jupyter Notebook, Github, PyCharm, Postman

SOFT SKILLS

Problem Solving

Creative Thinking

Collaboration & Communication

Time management

PROJECTS

Dynamic_Retail_Dashboard using ([Excel](#))

June2025

- Conducted a case study on Walmart using **Excel** and **pivot tables** for data analysis and segmentation.
- Used sparklines to track **KPIs** like **revenue** and **profit**; **analyzed product, regional, and segment** performance.
- Identified top/underperforming categories and provided actionable insights for inventory and marketing strategies.
- Recommended real-time KPI monitoring to improve operational understanding and year-over-year growth.

Digital Marketing Case Study-Clique Bait using ([SQL](#))

July2025

- Led a project leveraging **SQL joins, subqueries, CTEs, window functions** for User Behavior, Campaigns Performance, and Product Recommendation Analysis in the seafood industry, aiming to expand digital data analytics knowledge.
- **Key Insights:** The analysis revealed patterns in product views and their conversion to purchases at **49.9%**, identified frequently carted but unpurchased products at **15.5%**, and evaluated the effectiveness of campaigns in driving user actions and purchases.

ACHIEVEMENTS

- Solved more than 200 problems among various SQL Platform.
- 5* Coder on Hacker Rank in SQL.
