Profile Summary

Business Analyst with a robust foundation in Data Science and Visualization. Proficient in Python, SQL and tools like Tableau and Power Bi. I transform raw data into actionable insights to enhance the decision-making. Holding a bachelor of commerce and an Advance Certification in Business Analyst from UpGrad, I have successfully led projects across finance, marketing and services, uncovering valuable patterns for impactful outcomes.

Technical Skills

Tools/Languages: Python, SQL, Tableau, Power BI, Machine Learning (ML), Deep Learning, MS Excel (advance)

Framework: Pandas, Numpy, Scikit-Learn, Matplotlib

Key Skills

· **Data Manipulation** · **Data Visualization** · **Raw Data** · **Programming** · **Business Intelligence**

Projects

Project 1 : IMDb Movie Analytics Project

April 2024- May 2024

- Analyzed top 100 IMDb-rated movies from the past decade using Python to identify trends in genres, actors, and audience preferences.
- Performed exploratory data analysis (EDA) using Pandas and NumPy for data cleaning and transformation.
- Created insightful visualizations with Matplotlib and Seaborn to highlight actor influence, viewer ratings, and age-group voting patterns.
- Discovered actionable patterns such as genre popularity by age group, runtime trends, and correlation between actor popularity and IMDb ratings.
- Strengthened skills in data manipulation, pattern recognition, and data storytelling for decision-making support.
- **Python , NumPy , Pandas**

Project 2 : SQL

JUNE 2024 - JUNE 2024

- Analyzed 3 years of movie data using SQL (joins, aggregations, window functions, subqueries) to uncover audience trends, top-performing genres, and revenue patterns.
- Provided data-driven recommendations to support RSVP Movies' global expansion strategy.
- **SQL**

Project 3 : Lead Scoring Model – Logistic Regression

Dec 2024- Jan 2025

- Lead Scoring Model – Logistic Regression.
- Developed a logistic regression model to assign lead scores (0–100), predicting conversion likelihood using 9,000 historical leads.
- Used features like Lead Source, Website Activity, and Last Interaction to identify high-potential leads.
- Improved targeting by boosting conversion focus from 30% to 80% on “Hot” leads.
- Performed data cleaning, encoding, and model evaluation using ROC-AUC and precision-recall metrics.

Education

University of Lucknow
M.Com (Post Graduation)

June 2011 - June 2013
Second Division

Certificates

- ERP SAP(FICO) from WebCom Technologies
- Post Graduate Program in Business Analytics from Loyola Institute of Business Administration

Soft Skills

· Communication, Administrative management · Problem Solving · Adaptability · Teamwork · Time Management · Attention to Detail, Troubleshooting
