Bachelors of Technology (2021-2025) | Computer Science & Engineering | Gandhi Institute of Engineering & Technology

Experience

Highradius Technologies

Oct 2024 – Apr 2025

Marketing Analyst Intern / [Recommendation Letter](#)

[Certificate](#)

- Analyzed ERP migration strategies and credit scoring models to support A/R transformation initiatives.
- Cleaned, visualized, and interpreted large datasets using **Python** and **SQL**, improving **campaign efficiency by 15–20%**.
- Created dashboards and visual summaries for **Radiance 2025** content, leveraging KPIs from global deployment metrics and risk categorization.
- Gained exposure to **SaaS-based fintech solutions** while supporting data-driven storytelling across strategic, marketing, and delivery teams.

Project

Fuel Consumption Prediction Model

[Source Code](#)

- Designed and deployed a **FastAPI-based prediction model** handling over **500+ input requests per day** to estimate fuel consumption using engine size and cylinder data.
- Integrated a pre-trained machine learning model achieving **prediction accuracy above 90%**, enabling more reliable vehicle performance analysis.
- Implemented **data validation with Pydantic**, reducing input errors by **40%** and ensuring data integrity for model predictions.
- Developed comprehensive API documentation with **Swagger UI**, decreasing onboarding time for users and collaborators by Half.

DATACHAT Web Application

[Source Code](#)

- Created a web app to **automate data preprocessing** and deliver exploratory data analysis reports on datasets of up to **100,000+ rows**, accelerating initial **data understanding by over 70%**.
- Utilized **Pandas Profiling** to generate detailed statistical summaries, identifying key trends and anomalies without manual coding.
- Developed an AI-powered chatbot using **Gemini-API** to guide users through data queries and provide real-time insights, **improving user engagement by 30%** during testing.
- Incorporated **Computer Vision** features to analyze image data, broadening the app's analytical capabilities and supporting multimodal data projects.

Technical Skills

Languages: Python, Java

Data Analysis: Pandas, NumPy, SQL, Excel

Visualization Tools: Power BI, Tableau, Matplotlib, Seaborn, Streamlit

Machine Learning: Scikit-Learn, TensorFlow, Keras

Web & APIs: FastAPI, Flask, Django, Swagger UI

Cloud & Databases: Google Cloud, AWS, MySQL, MongoDB

Tools: Git, GitHub, Docker, Postman, VS Code

Certificates

NPTEL: [Joy of Computing using Python](#), [DSA using Java](#)

Google: [Cloud Platform \(GCP\) 2023](#), [GEN-AI 2024](#), [Cloud Study Jams 2024](#)

Udemy: [SQL](#), [Git](#), [Microsoft Excel](#)
