PROFILE SUMMARY

Motivated and passionate third-year BBA student with a major in Business Analytics and minor in Computer Science at FLAME University. Seeking opportunities to gain real-world experience and eager to apply analytical and technical skills in live business environments, with a strong interest in business analysis, design thinking, and data-driven projects.

SKILLS

Tools: Power BI, Tableau, Notion, Excel, Microsoft 365 Tools

Programming Languages: Python, C++, R, MySQL

Designing: Canva, Procreate, VN Video Editing, iMovie

PROFESSIONAL EXPERIENCE

Technology Intern

May 2025 - July 2025

Air India SATS Airport Private Limited

- Created numerous interactive cross-departmental dashboards using **Power BI** and **Excel**. Learnt **Power Query**, data cleaning, organizing, verifying, and visualization.
- Redesigned the Home and Digital 2.0 Page of the AISATS Intranet SharePoint site using **Microsoft 365 Tools**.
- Focused on translating business objectives into data-driven solutions.

Volunteer

May 2024 - September 2024

Divine Foundation NGO

- Taught underprivileged children basic academic and life skills.
- Developed communication and leadership abilities.

Graphic Design Intern

May 2024 - June 2024

Gracias Granny (New Norm Foods)

- Created promotional visuals and social media graphics using **Canva** and **Procreate**.
- Developed time management and professional work ethic in a fast-paced environment.

PROJECTS

Flight Data Visualization

April 2025

Cleaned and prepared flight datasets using **RStudio**, then visualized key insights using **Tableau**. Explored flight routes, durations, pricing trends, and performance of five major airlines across six Indian cities.

Automobile Market Analysis Project (Dataset of India 2022)

February 2025 - March 2025

Analyzed Indian car market data using **C++** using data structures with a focus on optimizing search and sort algorithms. Examined trends in pricing, fuel types, body styles, and car performance.

Data Visualization Project (U.S. Shopping Trends)

January 2025

Analyzed American customer shopping trends using **Tableau** to identify business growth opportunities. Focused on storytelling through visual dashboards for KPI on clothing preferences.

Python Mini Project – Hospital Management System

March 2023

Designed and developed a basic Hospital Management System using **Python** and **MySQL**. Managed patient records, appointments, and billing through an intuitive console-based interface.

EDUCATION

FLAME University, Pune

Expected Graduation: April 2026

Bachelor of Business Administration - Major in Business Analytics, Minor in Computer Science
