Professional Summary

A software engineer with strong fundamentals in Java, Python, and SQL with strong fundamentals in Data Structures, Algorithms, and Database Management. Having experience developing scalable machine learning solutions during an internship at BARC, applying deep learning and computer vision techniques. Passionate about building high-quality software products and solving real-world challenges through technology.

Education

- | | |
|--|-------------------------|
| MIT-World Peace University , Master of Computer Applications | August 2023 – July 2025 |
| <ul style="list-style-type: none">• GPA: 7.24/10.0• Coursework: Machine Learning, Data Structures, Algorithms, Java ,Python, SQL | |
| Vidyalankar School of Information technology , B.Sc Information Technology | August 2020 – July 2023 |
| <ul style="list-style-type: none">• GPA: 8.80/10.0• Coursework: Operating Systems, Networking, DBMS, Linux, OOPS | |

Experience

- | | |
|---|----------------------|
| Project Trainee(Machine learning Intern) , Bhabha Atomic Research Centre | Jan 2025 – July 2025 |
| <ul style="list-style-type: none">• Engineered a machine learning-based defect detection system to identify anomalies in industrial pipelines using OpenCV and deep learning on real-time video feeds.• Implemented frame-level timestamping and anomaly detection, achieving 95% precision across 20,000+ frames and reducing manual inspection time by 30%.• Deployed a scalable and production-ready computer vision pipeline in collaboration with cross-functional teams, enhancing operational safety and minimizing industrial hazard risks. | |

Projects

ML-Driven Crop Yield Prediction Framework

- Built a predictive model using Python, Scikit-learn, Pandas, and NumPy on 10+ years of agricultural data to forecast crop yields.
- Applied advanced data preprocessing (normalization, outlier removal, feature engineering) to improve model accuracy.
- Achieved 92% prediction accuracy and deployed a recommendation system to assist farmers in crop selection, potentially increasing yield by 15% and reducing manual decision-making.

HireEase Job Portal

- Developed a role-based job portal supporting job seekers and employers with secure authentication, session management, and CRUD functionality using Java, JDBC, and MySQL.
- Achieved 95% query efficiency over 1,000+ records by optimizing SQL queries and indexing strategy.
- Designed a normalized relational database (3+ tables) and implemented a modular architecture with object-oriented design principles, ensuring 100% data integrity and improving backend scalability and code reusability by 40%.

Technologies

Programming Languages: Python, Java, C++ , HTML/CSS, JavaScript, SQL, Linux

Technical Skills: Machine Learning, Computer Vision, Web Development, Software Testing

Fundamentals: Operating Systems, Networking, OOPS, DBMS, Data Structures, Algorithms

Soft Skills: Teamwork, Leadership, Communication, Problem Solving
