

J. VIMAL RAJ

mrvimalofficial@gmail.com | 6369824328 | Tamil Nadu

LinkedIn : <https://www.linkedin.com/in/vimal-raj/> | Portfolio: <https://vimal-raj-portfolio.lovable.app/>

OBJECTIVE

Aspiring Data Scientist with hands on experience in machine learning, deep learning, and data analytics. Skilled in leveraging data driven insights for decision making, with expertise in predictive modelling and feature engineering. Passionate about applying AI solutions to real world problems and continuously expanding technical knowledge.

EDUCATION

Bachelor of Engineering (B.E) – Computer Science

Aug 2020 - May 2024

University college of engineering Villupuram

CGPA Obtained: 7.83

St. Joseph's higher secondary school Chengalpattu - HSC

June 2019 - March 2020

Percentage Obtained: 71

SKILLS

- Programming: Python
- Statistics: Descriptive/Inferential Statistics
- Machine learning: Supervised/Unsupervised Learning | Regression | Classification | Clustering | Neural Networks | Deep Learning | Time Series | Model Evaluation & Optimization
- Database Management: MySQL
- Cloud Tools: AWS
- Libraries/Frameworks: scikit-learn | TensorFlow | Keras
- Data Analysis & Visualization: Pandas | NumPy | Matplotlib | Seaborn | Tableau | Power BI
- Soft Skills: Communication, Problem Solving, Cross-functional Teamwork
- Business Tools: Requirement Gathering, Business Metrics Understanding

INTERNSHIP EXPERIENCE

RUBIXE – AI SOLUTION COMPANY

Data Science Consultant

November 2024 - May 2025

- Led and contributed to multiple proof-of-concept and client-facing projects, utilizing data science methodologies to address complex, real-world challenges.
- Consistently met tight deadlines and project milestones, showcasing a strong work ethic and commitment to high-quality deliverables.
- Collaborated effectively with cross-functional teams to gather requirements, align on goals, and implement data-driven solutions that met business needs.

PROJECTS

Git Hub link: <https://github.com/vimalraj-cse>

1. Texas Salary Prediction Project | RUBIXE - AI SOLUTION COMPANY (DURATION 20 DAYS)

- Objective: Predict the salary of Texas employees based on features such as job title, agency name, and other employment-related factors.
- Data Preprocessing: Included handling missing values, encoding categorical features, and feature selection.
- Models Used: Implemented Linear Regression, Decision Tree Regressor, Random Forest Regressor, and Gradient Boosting Regressor.

Skills applied : Python | Pandas | NumPy | scikit-learn | Regression | Model Evaluation | Data Preprocessing | Exploratory Data Analysis

2. Heart Disease Prediction Project | RUBIXE – AI SOLUTION COMPANY (DURATION 20 DAYS)

- Objective: Predict whether a person has heart disease based on medical attributes like cholesterol, blood pressure, and age using classification algorithms.
- Techniques Used: Applied models like Logistic Regression, KNN, Decision Tree, and Random Forest with hyperparameter tuning.
- Evaluation Metrics: Used accuracy, confusion matrix, and classification report to compare model performances.
- Outcome: The Random Forest model achieved the highest accuracy, indicating its effectiveness for this health-related prediction task.

Skills applied : Python | scikit-learn | Classification | Model Evaluation | Data Preprocessing | Pandas | NumPy

3. Rice Leaf Disease Detection | RUBIXE – AI SOLUTION COMPANY (DURATION 20 DAYS)

- Designed an image classification model to detect diseases in rice leaves using deep learning.
- Preprocessed image data and used CNN (Convolutional Neural Networks) to classify healthy vs. diseased leaves.
- Achieved high accuracy in early detection, supporting smart agriculture and crop protection.

Skills applied: Python | TensorFlow | Keras | Deep Learning | CNN | Image Classification | Data Preprocessing

4. Teaching Assistance Evaluation | RUBIXE – AI SOLUTION COMPANY (DURATION 20 DAYS)

- Developed a multi-class classification model to evaluate teaching assistants' performance as Low, Medium, or High based on various feedback parameters.
- Performed data preprocessing, label encoding, and applied models like Decision Tree, KNN, and Random Forest for performance prediction.
- Achieved high classification accuracy, with Random Forest outperforming others, supporting effective academic performance assessment.

Skills applied : Python | scikit-learn | Classification | Model Evaluation | Pandas | NumPy | Data Preprocessing

5. Sales Force Effectiveness | RUBIXE – AI SOLUTION COMPANY (DURATION 30 DAYS)

- FicZon Inc. faces declining sales due to market competition and uses a manual, inefficient process for classifying lead quality, which hinders real-time decision-making.
- The project's objective is to automate lead classification into "High Potential" and "Low Potential" categories using Machine Learning to boost sales efficiency and facilitate timely engagement decisions.
- The project aims to explore data for insights into sales effectiveness and develop a machine learning model capable of predicting lead categories.

Skills applied : Python | scikit-learn | Pandas | NumPy | Classification | Data Preprocessing | Model Evaluation

6. Employee Performance Analysis | IABAC – CERTIFIED DATA SCIENTIST (DURATION 7 DAYS)

- Objective: Developed a machine learning model to predict customer churn in a telecom company based on customer behaviour, usage patterns, and service details.
- Techniques Used: Conducted data preprocessing, feature selection, and applied classification models like Logistic Regression, Decision Tree, and Random Forest.
- Outcome: The model accurately identified potential churners, helping the company take proactive retention measures and reduce customer loss.

Skills applied : Python | scikit-learn | Pandas | NumPy | Classification | Model Evaluation | Data Preprocessing

CERTIFICATIONS

- Certified Data Scientist – DataMites
- Python Certification- EduPrep
- Machine Learning Certification – GUVI
- ChatGPT Certification – GUVI
- IABAC – Data Science Foundation
- IABAC – Certified Data Scientist
- Niral Thiruvizha (Hackathon) State Competition
