WORK EXPERIENCE

CypherSol Fintech Pvt Ltd: MI Engineer

Aug 2024 – May 2025

- Engineered an **NER** model using **spaCy** to extract account holder details and categories from bank statements, obtained accuracy over **74%**.
- Automated reporting by scripting an **Excel VBA macro**, generates summary sheets dynamically and reduced manual effort by **56%**.
- Extracted and transformed data from bank statement PDFs by implementing text cleaning and built extraction test cases with **pdfplumber** and **Microsoft Table Transformer (TATR)**.
- Implemented an **OCR** system that converts scanned PDFs into searchable documents using **CLAHE (contrast enhancement)** and **watermark suppression**, delivered extraction accuracy of **87%** in 200+ files.

OZIBOOK: Data Analyst

Oct 2023 – May 2024

- Conducted Web scraping from LinkedIn to build a client-specific user data repository using **Selenium** and **BeautifulSoup**.
- Cleaned and preprocessed data to create dashboards that provided clear, actionable insights for the marketing team.
- Developed dashboards that helped the team make better decisions, making our processes **10%** more efficient.

SKILLS

- Programming Languages:** Python, C
- Machine Learning & AI:** Scikit-learn, Linear Regression, Logistic Regression, SVM, Decision Trees, Random Forest, XGBoost, Diffusion Model-GAN, NLTK, spaCy
- Data Analysis & Visualization:** Excel-VBA, Pandas, NumPy, Matplotlib, Seaborn, OCR, EDA, SQL, PowerBI
- Tools & Platforms:** GitHub, Jupyter Notebook, Google Colab, Streamlit

PROJECTS

Narrative Frames: Text to Video Generation

- Deployed an Streamlit Python application that converts input text into animated videos using **AnimateDiff**, **MotionAdapter**, and **Coqui TTS**.
- Implemented **conference resolution** in text preprocessing, used **MoCoGAN** for motion, added synchronized audio narration and enabled real-time sharing via **ngrok** for live demos.

Amazon Alexa Reviews Sentiment Analysis Project

- Designed an end-to-end **sentiment analysis** pipeline for Amazon Alexa reviews, using **NLP (text normalization, stemming, stopword removal)** and **ML**.
- Crafted features with **CountVectorizer** & built **Random Forest** and **XGBoost** models, resulted in **97%** F1-score.
- Conducted **EDA**, generated visualizations (bar charts, word clouds), and extracted key sentiment from over **3,100** reviews.

Hotel Booking Cancellation Analytics Project

- Analyzed data from **118,000+** hotel bookings, revealing a **21%** overall cancellation rate and it peaks over **30%** during the busiest months.
- Discovered that more than **60%** of cancellations were linked to group and online travel agent bookings.
- Formulated targeted business strategies helped to boost hotel revenue efficiency by up to **15%** by addressing key causes of lost occupancy.

CERTIFICATIONS

- Data Science Foundation - Great Learning
- Python for Data Science, AI & Development
- Python Programming - From Basic to Advanced Level [2021] - Udemy

EDUCATION

Shah And Anchor Kutchhi Engineering College

2022-2025

- B.Tech in Artificial Intelligence Data Science

CGPA: 7.88/10

K J Somaiya Polytechnic

2019-2022

- Diploma in Mechanical Engineering

Score: 82.30%
