Professional Experience

Intern at Cognitive solution

MERN Stack Development

May – July 2024 | Mangalore, India

During my internship at Cognitive Solution, I developed Feedforward, a Donation Management System using the MERN stack. This project involved building features for managing donations, tracking booking histories, and providing real-time feedback. Through this experience, I honed my full-stack development skills and gained valuable experience working in a collaborative professional setting.

Intern at Code Lab

Web Development (React.js)

November – December 2023 | Mangalore, India

I developed a Library Management System using React.js, focusing on features like storing books and real-time data updates. This project improved my skills in front-end development and creating responsive, interactive web applications.
