

VRUSHABH KASLIWAL

+91-9422552456 | vrushabhkasliwal2024@gmail.com | [LinkedIn](#) | [GitHub](#) | [Tableau](#)

Technical Skills

Databases and Languages: SQL, BigQuery, Python, Pandas, Numpy

Visualization Tool and Libraries: Tableau, Matplotlib, Seaborn

Other Skills: Advanced Excel, EDA, Product Analysis, Data Analysis, Probability, Statistics

Education

Scaler Academy

Dec 2023 – Present

Specialized in Data Science & Machine Learning

Pune University

June 2018 – June 2022

Bachelor of Engineering | 8.87 CGPA

Experience

Infosys Limited

Aug 2022 - Jan 2023

System Engineer

Mysore, India

- **Optimized database performance** with MySQL and Cassandra, achieving a **20% improvement** in query execution speed and enhanced scalability for high-volume data.
- **Enhanced Verizon's UTS source systems**, increasing data processing efficiency and reducing latency by **8%**, resulting in faster service delivery.
- Conducted comprehensive **UI performance analysis** and end-to-end testing on the Canvas UI platform, improving data visualization and **system performance by 5%**.
- Streamlined data integration from inventory systems, enabling standardized reporting on circuit and network topology, which improved decision-making **efficiency by 15%**.

Projects

E-Commerce Operational Analysis: Customer Behavior, Logistics, and Payment Trends | *SQL, Data Cleaning* | [Link](#)

- Analyzed a dataset of **100K+ e-commerce orders** using **SQL**, extracting insights on **sales trends, freight costs, delivery times, and payment behaviors**.
- Applied advanced SQL techniques such as **CTEs, Window Functions, and Aggregations** for data exploration.
- Generated actionable recommendations, highlighting a **tenfold growth** in e-commerce operations and evaluating its economic impact.

Global Streaming Platform: Data Exploration & Visualization | *Python Libraries* | [Link](#)

- Engineered data preprocessing tasks in **Python** using **NumPy, Pandas, Matplotlib, and Seaborn** to perform in-depth **EDA** on a large dataset (~10,000 rows).
- Handled missing values, rectified data anomalies, and ensured data integrity for accurate analysis.
- Provided insights to help optimize **content production** and **business growth strategies** across multiple countries.

Customer Segmentation & Behavioral Insights: Descriptive Analytics | *Python Libraries, Statistics* | [Link](#)

- Performed descriptive analytics using **Pandas** and **NumPy** to analyze customer demographics, treadmill usage patterns, and product preferences.
- Developed visual insights using **Matplotlib** and **Seaborn** to showcase customer distribution, product segmentation, and key **behavioral trends**.
- Constructed two-way contingency tables to identify relationships between **customer characteristics** and **treadmill purchases**, optimizing **product recommendations**.

Achievements

- Generative AI Fundamentals, Databricks | [Certification](#)
- Top Data Analysis Voice on LinkedIn | [Post](#)
- Achieved a 100-Day Coding Streak, Scaler | [Post](#)
