

YOGESH MOGER

DATA ENGINEER

◇ +91 9901032826 ◇ yogeshmoger52@gmail.com ◇ Bangalore, Karnataka ◇ Linked in

PROFILE

- Information Science Engineer with practical experience in data engineering, specializing in data cleaning, transformation, and ETL processes using Python, Pandas, MySQL, PostgreSQL, and basic PySpark.
- Proficient in containerization (Docker, Kubernetes), version control (Git, GitHub), RESTful API integration, and cloud fundamentals, contributing to efficient and scalable data workflows.
- Currently employed as an Assistant Lab Instructor, providing technical mentorship, debugging support, and hands-on coding assistance to students, enhancing their proficiency in core programming and data concepts.

SKILLS

Technical Skills: Python, MySQL, Pandas, PySpark, Git & GitHub, Docker, postgresql

Soft Skills: Time Management, Flexibility, Team Work, Problem Solving

Work Experience

RNS INSTITUTE OF TECHNOLOGY, Bangalore

October 2024 – Present

Assistant Lab Instructor

- Provided hands-on support to students in debugging and resolving coding errors across various programming assignments and lab exercises.
- Facilitated practical learning sessions, helping students understand core programming concepts and troubleshoot issues in real-time across multiple programming languages and tools.
- Guided students in understanding core programming concepts and logic, enhancing their problem-solving and analytical skills.
- Facilitated lab sessions by offering one-on-one technical assistance, ensuring clarity in code functionality and execution.
- Collaborated with faculty to maintain an effective learning environment and supported curriculum delivery through real-time code walkthroughs and demonstrations.

Tibil Solutions, Bangalore

April 2024 - Oct 2024

Technical Intern (Data Engineering)

- Developed and maintained ETL workflows for structured data pipelines using Python, Pandas, MySQL, and PostgreSQL, ensuring high data quality and integrity.
- Executed distributed data processing tasks using PySpark (basic) to enable scalable data transformation and performance tuning.
- Leveraged containerization technologies (Docker, Kubernetes) to deploy and manage microservices in a controlled development environment.
- Collaborated on data integration projects involving RESTful API consumption, version control (Git, GitHub), and cloud infrastructure, contributing to the delivery of robust data engineering solutions.
- Built ETL pipelines using Python, Pandas, MySQL, and PostgreSQL; supported data processing with PySpark and deployed services using Docker, Kubernetes, and REST APIs.

EDUCATION

Bachelor of Engineering (B.E)

Jun 2019 - May 2023

Don Bosco Institute of Technology, Bangalore.

Specialization: Information Science

CGPA: 7.00

PUC (Computer Science)

Jun 2017 - Apr 2019

Siddartha PU College.

Percentage: 82%

SSLC

Jun 2016 - May 2017

Shri Durga Parameshwari High School

Percentage: 78%

PROJECT

Multiclass Pathology Classification In a Voice Signal Using Deep Learning Technique

Jan 2023 - May 2023

- Developed a Deep Neural Network model combining Convolutional, Pooling, LSTM, and Fully Connected layers to detect voice pathology disorders using voice signal data.
- Designed the system to compare input voice data with trained datasets and identify highly matched patterns indicating potential voice disorders.
- Aimed to create a cost-effective, time-saving diagnostic tool for use in remote areas lacking access to advanced medical facilities.
- Enabled early and accessible detection of vocal health issues, minimizing the need for patients to travel to high-tech hospitals for initial examinations.
- Implemented the model using machine learning frameworks and signal processing techniques, ensuring accuracy and efficiency in voice-based health screening.

CERTIFICATION

Completed (PYTHON,SQL & WEB Technologies, DJANGO, REST API) Training
from Pentagon Space Bangalore.

Jul 2023 - Jan 2024

LANGUAGES

- English
- Kannada
