Recent graduate in CSE-AIML with hands-on experience in conducting research, data analysis, and synthesizing insights for strategic decision-making. Skilled in delivering accurate and timely results in fast-paced environments. Strong communicator with a client-focused mindset, eager to contribute to cross-functional teams and grow within a research-driven, collaborative culture.

Education

Bachelor of Technology, CSE-AIML from RGPV University	2021-2025
Relevant Coursework: DBMS, Operating Systems, Cloud Computing, AI & ML	CGPA- 8.04

Work Experience

Hakuhodo | Business Analyst

Jan 2025 - July 2025

- Conducted **secondary research** on market trends and competitive landscapes using public data sources, industry databases, and commercial reports.
- Collaborated with internal stakeholders to scope research objectives and deliver **timely, accurate insights** tailored to business development and client projects.
- Synthesized findings into concise PowerPoint decks and Excel summaries, contributing to strategic proposals and case studies.
- Maintained high attention to detail under tight deadlines, ensuring research outputs met quality standards and client expectations.
- Participated in a fast-paced, **team-oriented environment**, demonstrating a strong **customer-first** approach and commitment to professional development.

Devtown | Business Analyst intern

Feb 2024 - Jul 2024

- Defined KPIs and dashboard metrics with Sales Ops to support data-driven sales decisions, resulting in 15% more informed decision-making.
 - Documented FRD, BRD, use cases, and SOPs—creating end-user dashboards and training collateral.
 - Elicited and refined requirements and worked with data analysts to inform backend logic.
 - Executed testing and defect identification to support product reliability and accuracy.
