Immediate Joiner | B.Sc. in Computer Science | Java Backend Developer | SQL | Data Analytics Enthusiast

Professional Summary

Analytical and motivated Java Backend Developer with a Bachelor's degree in Computer Science and strong foundational skills in Java, Spring Boot, REST APIs, and SQL. Demonstrates interest in user behavior analysis, Open Banking trends, and modern data ecosystems. Completed hands-on full stack training with practical projects in backend architecture and frontend integration. Proficient in debugging, version control, and Agile methodologies. Eager to apply analytical skills and explore fintech or data-driven roles with a collaborative team.

Technical & Analytical Skills

- Programming: Java (7, 8+), SQL, Python, REST API Development
- Frameworks & Tools: Spring Boot, Spring Security, Hibernate, Postman, Maven, Git
- Frontend: React.js, HTML5, CSS3, JavaScript, Bootstrap
- Databases: MySQL, SQL Server, Oracle
- Data Analysis: Excel, Power BI (Beginner), Tableau (Beginner)
- Concepts: Object-Oriented Programming, Microservices, Agile Development, Open Banking (Understanding)
- Soft Skills: Communication, Problem-Solving, Time Management, Team Collaboration, Multitasking

Projects

User Behavior Insights Dashboard

Tech Stack: Python, SQL, Excel, Power BI

-Collected and cleaned user transaction data using SQL queries to extract meaningful metrics.

-Analyzed user activity trends and purchasing patterns using Python (Pandas, Matplotlib).

- Created a dynamic dashboard in Power BI to visualize user behavior KPIs such as session time, click-through rate, and bounce rate.

- Presented data-driven recommendations for improving user engagement and retention.

Hotel Management System

- Built backend services for managing hotel operations using Spring Boot and MySQL.
- Developed secure RESTful APIs for communication between modules.
- Performed unit testing and debugging to enhance system efficiency.
- Practiced Agile teamwork and business requirement analysis.

BCCI Website Clone

- Designed a responsive web interface using React.js mimicking the BCCI official site.
- Implemented React Router for seamless navigation and used mock JSON data for dynamic updates.
- Applied React Hooks for state and lifecycle management.

Certifications

- Java Full Stack Development – Cyber Success, Pune
 - Covered Java, Spring Boot, Hibernate, REST APIs, MySQL, and React.js with hands-on project experience.
- Data Analytics Certification – Cyber Success, Pune
 - Covered data analysis using SQL, Excel, Power BI, and Python with hands-on dashboard and analytics project experience

Education

- B.Sc. in Computer Science – Sangola College, Solapur University – 2024
- HSC – New English School, Sangola – 2021
- SSC – New English School, Sangola – 2019
