WORK EXPERIENCE

Business Intelligence Intern
CodeTech Solution | Jan 2025 – June 2025

Tools: Power BI, Excel, Power Point, SQL, Power Query, DAX

- Analyzed product performance, shelf life patterns, and regional sales trends
- Integrated Excel and SQL data sources using Power Query; created calculated columns and KPIs using DAX
- Gathered business requirements through discovery sessions with stakeholders and documented them in BRDs and workflow outlines.
- Supported process review activities to identify inefficiencies and redundancies in the billing cycle.
- Created structured documentation (process maps, AS-IS/TO-BE models) to support internal business improvement proposals.
- Maintained project tracking using JIRA and documented milestones, timelines, and dependencies for cross-functional visibility.
- Assisted in preparing data-driven reports and insights for leadership decision-making using Excel and Power BI.
- Contributed to internal knowledge base and compliance reporting through Confluence
- Contributed to internal proposal processes and supported decision-making with structured documentation and reporting.
- Drafted documentation that served as the basis for technical proposals and operational change requests.
- Coordinated with multiple departments to ensure timely deliverables and alignment with project goals.
- Gained experience working with business leads and analysts to validate data and support business recommendations.

Outcome: Reduced reporting time by 40% and enabled inventory and sales insights for business stakeholders.

PROJECTS:

Big Data Analytics Project: Urban Sales Insights

Role: Business Analyst (Intern/Project)

Tools: Excel, Power BI, SQL, Python (basic), MS PowerPoint, Hive, Sqoop, HDFS,

- Gained hands-on experience with business reporting, data validation, and generating insights to support decision-making.
- Supported business development and sales teams by creating visual reports that influenced future campaign planning.
- Assisted in tracking project deliverables and timelines during the analytics phase.
- Developed a strong understanding of business documentation and how data insights support proposal submissions.

Outcome: Identified a 15% opportunity gap in promotional timing that was later addressed in the next campaign cycle. Helped prioritize three urban regions for product expansion based on trend analysis, aiding regional strategy proposals.
