PYTHON

PERSONAL PROJECTS

E-commerce Dashboard

- Created an interactive dashboard for E-commerce to monitor sales, customer behavior, and inventory levels. Analyzed sales trends, customer acquisition costs, and product performance; provided real-time insights to optimize marketing campaigns. Tools Used: Power BI. Outcome: Improved sales forecasting accuracy by 20% and optimized inventory management, reducing stock output by 10%.

SuperStore Sales Dashboard

- Developed a comprehensive sales dashboard for Superstore to track sales performance across regions, product categories, and time periods. Tools Used: Power BI. Outcome: Helped the sales team identify opportunities for growth, leading to a 12% increase in overall sale
