Professional Summary

Data Science and AI professional with proven expertise in Machine Learning, Business Intelligence, and Full-Stack Development. 3+ years of experience creating data-driven solutions that delivered measurable business impact, including financial analytics platforms with 85% prediction accuracy and business intelligence dashboards that improved decision-making speed by 25%. Currently pursuing advanced studies in Data Science and AI to further enhance expertise in predictive modeling and artificial intelligence applications.

Core Competencies

Data Science & AI: Machine Learning, Predictive Modeling, Statistical Analysis, TensorFlow, Keras, PyTorch, Scikit-learn
Programming: Python (Advanced), SQL, Java, JavaScript, C/C++, R, NumPy, Pandas
Business Intelligence: Power BI, Tableau, Data Visualization, KPI Development, Dashboard Design, Metrics Analysis
Full-Stack Development: React, Django, Flask, FastAPI, RESTful API Design, HTML5, CSS3, Bootstrap
Database & Data Engineering: MongoDB, MySQL, Firebase, Data Warehousing, ETL Pipelines, Data Modeling
Cloud & DevOps: AWS Services, Docker, Kubernetes, CI/CD Pipelines, Git, Version Control, Agile Development
IoT & Embedded Systems: Arduino, Sensor Integration, Firmware Development, Real-time Monitoring, Edge Computing

Professional Experience

Narayani Associates

Nov 2024 – Present

Senior Business Intelligence Specialist

Pune, Maharashtra

Design and implement end-to-end business intelligence solutions for Fortune 500 clients, resulting in 25% faster decision-making processes and 40% more accurate forecasting capabilities.

Architect and optimize data analytics pipelines processing 500,000+ data points daily, implementing automated ETL processes that reduced manual reporting time by 75%.

Spearhead the development of custom visualization dashboards using Power BI and Tableau, delivering real-time KPI tracking that improved cross-departmental data accessibility by 30%.

Lead a team of 4 BI developers, implementing agile methodologies that increased project delivery efficiency by 35% and reduced development cycles by 20%.

Shekrulabs India Pvt. Ltd.

Jun 2024 – Oct 2024

Senior Data Scientist

Pune, Maharashtra

Architected AutoProfito, an advanced financial analytics platform incorporating NLP and deep learning models that achieved 85% prediction accuracy for market movements and 92% for sentiment analysis.

Developed and deployed machine learning algorithms for algorithmic trading that processed 100,000+ market data points hourly, improving trade performance by 20% and reducing false signals by 35%.

Engineered high-performance RESTful APIs and scalable data pipelines that handled 10GB+ of financial data daily, reducing processing time by 40% and improving system stability during market volatility.

L&T Technology Services

Dec 2021 – Aug 2022

Associate Engineer - AI/ML

Mysuru, Karnataka

Implemented cloud-based infrastructure and DevOps workflows for IoT data processing that improved deployment efficiency by 35% and reduced system downtime by 25%.

Developed Python-based machine learning solutions for predictive maintenance in manufacturing, resulting in 20% reduction in equipment failures and saving \$150,000 annually in maintenance costs.

Created automated monitoring systems for industrial IoT deployments that increased data capture accuracy by 30% and enabled real-time anomaly detection with 95% precision.

Emertxe Information Technologies

Mar 2023 – May 2023

IoT Developer Intern

Pune, Maharashtra

Designed and implemented an enterprise-grade home automation system using Arduino and IoT modules that achieved 99% uptime and enabled secure remote control capabilities.

Optimized C/C++ firmware for resource-constrained IoT devices, reducing data transfer latency by 40% and power consumption by 25%.

Integrated multiple sensor technologies with AWS IoT Core for real-time environmental monitoring, achieving 95% accuracy in data collection and analysis.

Education

International Institute of Information Technology Bangalore (IIITB)

2025 – Present

Post Graduate Diploma in Data Science and Artificial Intelligence

Bengaluru, Karnataka

Specializing in Advanced Machine Learning, Deep Learning, Natural Language Processing, and Computer Vision.

Selected for competitive program with 15% acceptance rate; maintaining top 10% position in cohort.

Savitribai Phule Pune University

2021 – 2024

Bachelor of Engineering in Computer Engineering (8.3 CGPA)

Pune, Maharashtra

Relevant Coursework: Data Structures & Algorithms, Machine Learning, Database Management Systems, Computer Networks, Software Engineering

Final Year Project: Automated Financial Analytics System using Machine Learning (Received University Recognition)

Government Polytechnic, Karad

2018 – 2021

Diploma in Computer Engineering (94%)

Karad, Maharashtra

Key Projects

AutoProfito & Stocksync | *Advanced Financial Analytics Platform* |

Technologies: Python, React, FastAPI, TensorFlow, AWS, PostgreSQL, Redis

Engineered an enterprise-grade financial analytics platform that processed 50,000+ market data points per minute, providing real-time insights with 85% accuracy for investment decisions.

Implemented distributed computing architecture that reduced order execution latency by 30% and enabled high-frequency trading capabilities for institutional clients.

Developed interactive dashboards with React and D3.js that visualized complex financial patterns, increasing user engagement by 45% and reducing time-to-insight by 60%.

AlgoTrading System | *ML-Powered Trading Platform* |

Technologies: Python, TensorFlow, Keras, Financial APIs, AWS Lambda, DynamoDB

Developed a production-grade algorithmic trading platform with ensemble machine learning models that achieved 82% accuracy in predicting price movements across diverse market conditions.

Created a comprehensive backtesting framework that simulated 5+ years of multi-asset market data to validate strategy performance with statistical significance testing.

Integrated with multiple broker APIs for automated trade execution, handling 200+ transactions daily with 99.9% reliability and sub-second execution timing.

AMICR | *Advanced Military Intelligence System* |

Technologies: Robotics, Computer Vision, TensorFlow, PyTorch, ROS, Sensor Fusion, Edge Computing

Designed and developed an AI-powered military intelligence system that achieved 95% accuracy in threat detection under adverse environmental conditions.

Implemented optimized computer vision algorithms capable of processing 30+ frames per second on edge devices for real-time target recognition in limited-connectivity environments.

Developed advanced sensor fusion techniques that integrated data from thermal, motion, and acoustic sensors to enhance situational awareness with 98% reliability in field tests.

Publications & Research

Advancing Military Intelligence Through AI-Powered Robotics and Sensor Fusion | International Conference on Information Technology and Emerging Technologies (ICITET-2024)

Published peer-reviewed research on novel integrations of deep learning algorithms with multi-sensor robotics for enhanced situational awareness and autonomous threat detection in military applications.

Research findings demonstrated 40% improvement in detection range and 35% reduction in false positives compared to traditional systems.

Professional Certifications

AWS: AWS Certified Machine Learning Specialty, AWS Certified Solutions Architect Associate

IBM: IBM Data Science Professional Certificate, IBM AI Engineering Professional Certificate

Google: TensorFlow Developer Certificate, Google Professional Data Engineer

Microsoft: Microsoft Certified: Azure Data Scientist Associate, Power BI Data Analyst Associate

DeepLearning.AI: Deep Learning Specialization, Natural Language Processing Specialization

Leadership Experience

National Service Scheme (NSS) Technical Team Lead	2022 – Present
<i>Digital Literacy and STEM Education Initiative</i>	<i>Pune, Maharashtra</i>
Lead a team of 15 volunteers developing and implementing digital literacy programs that have impacted 500+ individuals across rural Maharashtra, achieving 85% skill proficiency among participants.	
Designed and launched a STEM education initiative that introduced programming and robotics to 200+ underprivileged students, with 30% pursuing further technical education.	

Languages

English: Professional Proficiency (C1)

Hindi: Native Fluency

Marathi: Native Fluency

Kannada: Professional Working Proficiency (B1)

Professional Skills

Project Management, Agile/Scrum Methodologies, Cross-functional Team Leadership, Technical Mentorship

Advanced Data Analysis, System Architecture Design, Technical Documentation, Stakeholder Management

Problem-Solving, Strategic Planning, Process Optimization, Research & Development, Innovation
