## COURSEWORK

### UNDERGRADUATE

google data analytics certification  
Coursera  
SQL Coursera  
Tablue  
IBM data analyst bootcamp  
database management system(DBMS)  
Computer Hardware and Networking

## SKILLS

### PROGRAMMING

Experienced:

Python  
Pandas  
Numpy

intermediate:

CSS  
HTML

C++

Familiar:

• MySQL

## INTERNSHIPS

### COMPUTER HARDWARE AND NETWORKING

May 2023 - June | VTU-National Academy of skill development

- Provided technical support for computer hardware and software issues
- Installed operating systems and other computer software applications on new computers

### CYBERSECURITY VIRTUAL EXPERIENCE PROGRAM

JP Morgan Chase and Co.(Virtual)

- Analyze a Large Dataset of Fraud in Financial Payment Services
- Learnt About Application Security Fundamentals

## PROJECTS

### ARDUINO Based Fire FIGHTING Robot with SMS AND Call Alert

- It is an innovative solution designed to detect and extinguish fires .
- It has been provided with real-time notifications to users through SMS and calls .

### ADVANCED IOT TECHNOLOGY AND MACHINE LEARNING TECHNIQUES FOR MONITORING WATER LOGGING IN UNDERPASS

- Developed a system utilizing IoT sensors and machine learning algorithms to monitor and predict water logging conditions in underpasses.
- Implemented real-time data collection and analysis for proactive management of water-related issues.

## CERTIFICATIONS

- DataStructures and Algorithms(DSA) using c++ - Udemy
- Python - Udemy
- HTML - Udemy
- Arm Cortex- M Processors Overview - Coursera

## LANGUAGES

**ENGLISH , KANNADA , HINDI**
