PROFESSIONAL SUMMARY

Versatile Computer Science graduate with expertise in Data Science and Machine Learning, skilled in Python, Pandas, NumPy, and Scikit-learn. Experienced in deploying ML models like Fake News Detection using NLP and APIs. Adept at turning complex datasets into actionable insights through statistical analysis and predictive modeling.

SKILLS

- **Programming Skills:** Java, Python, HTML, CSS, JavaScript.
- **Frameworks:** React.js, Node.js, Spring, Hibernate, JSP.
- **Other Tools:** Linux OS, Git and GitHub, Microsoft Office.
- **Libraries :** Pandas, NumPy, Matplotlib, and Scikit-learn.
- **Rest API's** and Natural Language Processing Technique.

INTERNSHIP AND TRAINING

Java Learning Center, Bangalore

Bangalore

Java Full Stack Development Trainee

- Gained a strong foundation in Java, SQL, DSA, Spring, and Hibernate, with hands-on experience in JDBC, REST APIs, Servlets, JSP, and PL/SQL.
- Developed and tested Java applications using VS Code as the primary IDE.

Pranaksh Technologies LLP

Belagavi

Research Intern, Data Science using Python

- Proficient in Python for data analysis, statistical modeling, and machine learning.
- Experienced in using libraries like Pandas, NumPy, Matplotlib, and Scikit-learn to manipulate data, visualize insights, and build predictive models for data-driven decision-making.

EDUCATION

Jain College Of Engineering And Research Belagavi

Belagavi, India

Bachelor of Computer Science and Engineering; CGPA: 8.07

May 2024

KLE Society's Independent PU College

Chikodi, India

Pre-University Education; Percentage: 78.66

March 2020

K J Somaiya English Medium School

Sameerwadi, India

Secondary Education; Percentage: 71.5

April 2018

PROJECTS

Fake News Detection using NLP through APIs

- Developed and deployed a fake news detection system using Natural Language Processing (NLP) techniques.
- Leveraged APIs for efficient data extraction, processing, and analysis, implementing machine learning models to classify news authenticity.
- Achieved accurate classification of news authenticity by utilizing datasets for data extraction and integrating APIs for preprocessing and analysis.

Simple ChatGPT

- Developed an AI-driven Android app using the OpenAI API to facilitate interactive conversations.
- Integrated OkHttp to handle HTTP requests efficiently, ensuring smooth communication with the API.
- Built as part of the MAD LAB (Mobile App Development) course, showcasing skills in mobile UI design, API integration, and Android development best practices.

CERTIFICATIONS

- **Acme Computers:** Java Programming
- **Udemy:** Data Structures and Algorithms
- **Simplilearn:** Object-Oriented Programming.
- **Dhaapps:** Python Programming
