SUMMARY

A motivated and Computer Engineering student with hands-on experience in full-stack web development, machine learning, and cloud computing. Skilled in Python, React, Django, and Microsoft Azure with a demonstrated ability to build responsive web applications and predictive models. Completed the Microsoft AZ-900 certification and contributed to impactful projects like flight delay prediction and fish population forecasting. Strong problem-solving, teamwork, and communication skills developed through academic and internship experiences. Actively involved in coding platforms like HackerRank and LeetCode with 150+ problems solved.

EDUCATION

Navsahyadri Group of Institutes, Pune <i>Bachelor of Computer Engineering</i>	June 2021 – June 2025 <i>CGPA: 7.42</i>
Dada Patil Mahavidyalaya, Karjat <i>Higher Secondary Education (HSC)</i>	June 2020 – June 2021 <i>Percentage: 72.67%</i>
Shri Shrirang Bapu More Vidyalaya, Shimpore <i>Secondary Education (SSC)</i>	June 2018 – June 2019 <i>Percentage: 71.80%</i>

TECHNICAL SKILLS

Languages: Python, HTML, CSS, JavaScript
Frameworks: React, Django, Bash
Database: SQL, DBMS
Developer Tools: VS Code, Git/GitHub, Jupyter Notebook, Windows
Soft Skills: Problem Solving, Communication, Time Management, Teamwork

PROJECTS

Portfolio Website

View Project

- Personal portfolio site created with HTML, CSS, and Bootstrap.
- Showcases my projects, skills, and contact information.

Flight Delay Prediction Web App

GitHub

- Developed a web app using React to predict flight delays using APIs.
- Focused on writing optimal and responsive code for best performance.

Fish Weight Prediction

GitHub

- Developed a machine learning model to predict fish populations using historical data and time series forecasting techniques.
- Utilized Python and libraries such as Pandas, Scikit-learn, and Matplotlib for model training, visualization, and evaluation.
- Achieved 92% prediction accuracy, demonstrating the model's effectiveness in estimating fish population trends.

EXPERIENCE

Microsoft Azure Cloud Internship (AZ-900 Fundamentals)

Feb 2023 – Jul 2023

- Completed the Microsoft AZ-900: Azure Fundamentals certification covering cloud concepts and Azure core services.
- Worked hands-on with services like Azure VMs, Blob Storage, App Services, SQL Database, and Azure Portal.
- Deployed a web app using Azure App Services and managed resources using Azure CLI and ARM templates.

ACHIEVEMENTS

- Solved 150+ coding problems on platforms like HackerRank, LeetCode, and GeeksforGeeks.
- Completed GUVI Python programming course from basics to advanced.
