PROJECTS

YouTube Analytics Project – Data Trend Analysis using Python, API, and ML Classification

- Engineered a robust Python pipeline that automated the extraction and cleansing YouTube video marketing keywords, significantly reducing manual processing time by 70%.
- Utilized Postman for API testing and converted JSON responses to structured Excel/CSV using pandas.
- Scraped Instagram Reels, posts and comments using Apify to gather captions, tags, views and sponsorship data.
- Configured and deployed Apify actors with keyword filters; processed and stored final datasets for cross-platform analysis.
- Manually labelled datasets for keywords; extracted and engineered features to enhance model training.
- Conducted manual analysis for 100+ videos; created summary decks and Excel reports to present insights.

Movie ticket reservation app

- Designed user-friendly interface for a movie ticket booking app using Figma.
- Focused on intuitive design, layout consistency, and visual hierarchy.

INTERNSHIP

Tata Data Visualization: Empowering Business with Effective Insights, Tata Forage

- Created business dashboards using Power BI and Tableau for simulated case studies.
- Documented business insights and translated technical data for non-technical decision-makers.

AI-ML Virtual Internship- AICTE-EDUSKILLS

- Implemented decision trees, random forests, and neural networks to analyze diverse real-world data sources, increasing classification precision up to 79% across all labeled categories and, enabling more accurate business insights.

EDUCATION

Bachelor of Technology - Information Technology

D.Y. Patil University, Pune | 2021 - 2025 | 8.3 GPA

Nowrosjee Wadia College, Pune

HSC, MSBSHSE (science) | 2018 - 2020 | 52%

Dr. Anna Saheb Chobhe High School, Pune

SSC, MSBSHSE | 2017 - 2018 | 69.80%

SKILLS

Programming & Data Handling: Python, SQL, Core Java, HTML, CSS, R, Excel, Pandas, scikit-learn, JSON handling, API integration

Data Visualization & Reporting: Power BI, Tableau, Excel, Deck creation

Tools & Platforms: Google Colab, YouTube data API, Postman, Figma, VS Code

Other Skills: Data Cleaning, Data Validation, Feature Engineering, Data Labelling, Market Analysis, Dashboard Creation, Communication, Insight Presentation, Trend Analysis

Languages: English, Hindi, Marathi, German (A2), Japanese (JLPT N5 in progress)
