EDUCATION

Ajeenkya DY Patil School of Engineering

June 2021 – June 2025

B.E. - Artificial Intelligence and Data Science - **CGPA - 9.20/10**

Pune, India

EXPERIENCE

Allvue Systems [↗](#)

Aug 2024 – Nov 2024

Role - Software Engineer Intern

Remote

- Optimized product portfolio systems using **C# and SQL Server**, boosting performance by **50–62%**.
- Developed scalable dashboards and data visualizations, improving system efficiency by **34%**.

Igurus Consultancy [↗](#)

Dec 2023 – Apr 2024

Role - Software Engineer (Research)

Remote

- Built production-ready deep learning systems for OCR and **language processing (70–99% accuracy)**.
- Implemented **data engineering pipelines and scalable model architectures** for enterprise deployment.

PROJECTS

CheckmateX - Scalable Chess AI Platform [↗](#) | Python, TensorFlow, Vitejs

Aug 2024 – Apr 2025

- Engineered a **production-grade AI system (98% accuracy)** rivaling Stockfish with scalable architecture.
- **Reduced latency by 30%** through system performance optimization for multiplayer functionality.
- **Impact : Enhanced chess learning and community engagement with a high-accuracy platform.**

Enterprise Indic Language System [↗](#) | Python, Transformers, PySpark, Hadoop

Feb 2024 – Apr 2024

- Developed a scalable **NLP system using Transformers, ResNet-50, and RNN (99% accuracy, outperformed Google)**.
- Built **data engineering pipeline with PySpark and Hadoop**, reducing processing time by **25%**.
- **Impact : Improved digital access to Indic languages, supporting linguistic diversity.**

Smart Transit AI System [↗](#) | Python, LSTM, XGBoost, AWS

Mar 2024 – Apr 2024

- Created a production ML system using **LSTM and XGBoost (90% accuracy, surpassed Google Maps)**.
- Implemented scalable route optimization with reinforcement learning, **reducing travel time by 12%**.
- **Impact : Enhanced urban mobility with efficient routing, minimizing commuter delays.**

OCR Production System [↗](#) | Python, CNN, PySpark

Dec 2023 – Feb 2024

- Engineered a scalable **CNN architecture**, improving system accuracy from **68% to 94.6%**.
- Optimized data engineering workflows, **increasing system performance by 20%**.
- **Impact : Enabled digitization of cultural texts, enhancing preservation and accessibility.**

TECHNICAL SKILLS

Languages: Python, C#, R

Machine Learning: Scikit-learn, XGBoost, LightGBM, FastAI, CatBoost, Optuna

Deep Learning: PyTorch, TensorFlow, Keras, CNNs, RNNs, GANs

Generative AI & LLMs: Hugging Face Transformers, GPT-3/4, BERT, LLaMA, Falcon, LoRA, QLoRA

Data Engineering: Hadoop, Pyspark, ETL Pipelines, PowerBI, Apache Kafka, XGBoost, NLTK, Data Factory

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Jenkins, Cloud Deployment

Databases: PostgreSQL, MySQL, MongoDB, Vector Databases, Redis

Developer Tools: Git/GitHub, Unix/Linux

CERTIFICATIONS

- Microsoft Azure AI Fundamentals
