PROFESSIONAL SUMMARY

Aspiring Data Scientist skilled in machine learning, data analysis, and predictive modeling. Proficient in Python, SQL, Power BI, and Tableau. Passionate about building ML models and dashboards for data-driven decisions.

EDUCATION

B.Tech in AI and Machine Learning , G H Rasoni College of Engineering and managment , Pune CGPA: 7.93/10	2021 – 2025
HSC , Mukteshwar Junior College, Latur Percentage: 88.50%	2019 – 2021
SSC , Shree Vyankatesh Vidya Mandir, Ambajogai Percentage: 73.60%	2019

SKILLS & CERTIFICATIONS

Skills

Data Analysis	Excel, Power BI, Tableau, Matplotlib, Seaborn
Programming	Python, SQL, HTML, CSS
Machine Learning	Regression, Classification
Databases	MySQL, PostgreSQL, Firebase
ETL	Power Query, Extract/Transform/Load
Soft Skills	Problem-Solving, Communication

Certifications

Python	Joy of Computing (NPTEL)
Power BI	Udemy
Flutter	Udemy

EXPERIENCE

Data Scientist and Analyst Intern Tech-Lantern Solutions, Pune, India	Jan 2024 – Jun 2024
- Analyzed large datasets to derive insights. - Built predictive ML models for business cases. - Created visualizations and reports for decision-making.	

PROJECTS

Crime Alert: AI-Based Scream Detection System. Real-time scream detection On-device processing ensures privacy with GPS alerts. Technologies: Python, Librosa, ML/DL, Kotlin. (View)
Face Emotion Detection System. Real-time emotion detection using OpenCV and deep learning. Technologies: Python, OpenCV, TensorFlow. (View)
Movie Recommendation System. Content-based recommendations using cosine similarity. Technologies: Python, Streamlit. (View)
Car Price Forecasting Model. Car price prediction using regression models. Technologies: Python, Scikit-learn. (View)
E-Commerce App. Flutter app with Python backend. Technologies: Flutter, Dart, Python. (View)
