

SAMREEN NAQVI

Bhopal, Madhya Pradesh — samreennaqvii36@gmail.com — +91 9993176040 — Github — LinkedIn

EDUCATION

Vellore Institute of Technology, Vellore Integrated M.Sc in Computational Statistics and Data Analytics — CGPA: 8.55	2020-2025
Carmel Convent Senior Secondary School, Bhopal 12th CBSE (82.4%)	2019-2020
Carmel Convent Senior Secondary School, Bhopal 10th CBSE (75.6%)	2017-2018

SKILLS

Languages: C/C++, Python, Java, HTML, R, SQL, CSS

Frameworks and Tools: Pandas, Numpy, Git, Pytorch, Matplotlib, Seaborn, SciPy, Scikit-learn, TensorFlow, Jupyter Notebook, Microsoft Excel, Canva, SPSS, Power BI

CERTIFICATIONS

Executive Post Graduate Certification in Data Science and AI (*iHUB Sampark, IIT Roorkee*)

- Completed certification in Data Science and AI, focusing on machine learning, deep learning, and data analysis.
- Gained proficiency in Python, R, and AI tools for building and implementing models.
- Applied knowledge through real-world projects and case studies in AI and data-driven problem solving.

EXPERIENCE

Rainbow Money Pvt Ltd- FinTech startup

Data analytics intern (remote)

April 2025 - present

- Built and automated portfolio analytics pipelines using Python to generate insights from mutual fund data (eCAS, NAV history, holdings).
- Designed logic for FIFO-based invested value, fund-wise XIRR/CAGR, asset allocation, and market cap splits for accurate portfolio evaluation.
- Developed reusable modules to compute equity sector exposure, risk-return summaries, and performance attribution metrics.
- Collaborated cross-functionally to reconcile data with benchmark tools and ensure analytical parity with platforms like Value Research and BeyondIRR.

PROJECTS

Books Recommendation System

- Developed a collaborative filtering-based book recommender system using clustering
- Preprocessed and cleaned the dataset to ensure data quality, achieving an accuracy rate of 85
- Evaluated model performance using metrics like precision (0.82), recall (0.85), F1-score (0.83), and mean squared error (0.12)
- Leveraged clustering algorithms to group users with similar preferences, resulting in a 15

Churn Prediction In Telecommunication

- Built a logistic regression model for customer churn prediction with comprehensive preprocessing (missing values, categorical encoding).
- Applied oversampling (RandomOverSampler) to handle class imbalance, enhancing churn detection in minority class.
- Achieved 0.49 accuracy and 0.53 recall for churn class, indicating effectiveness in identifying at-risk users.
- Analyzed key drivers such as data usage and partner differences, offering insights for retention strategies.

Early Disease Detection

- Developed a logistic regression model in Python to assess diabetes risk using clinical and demographic data from Kaggle.
- Conducted preprocessing: handled missing values, encoded features, and applied scaling (StandardScaler) to improve accuracy.
- Evaluated model with metrics: 0.95 accuracy, precision, recall, F1-score, confusion matrix, and ROC-AUC.
- Interpreted results using feature coefficients and ROC curve to highlight key predictors and support early diagnosis.

EXTRA-CURRICULAR ACTIVITIES

Computer Society of India CSI- VIT

Member of Team Events

September 2022 – June 2024

- Coordinated flagship events 'TechStorm' and 'CodeConnect' with 250+ participants, boosting engagement in coding and software development.
- Planned and executed 'CodeX', a 36-hour hackathon with 180+ participants focused on Python, data analytics, and web development.
- Helped conduct workshops on ML, data visualization, and programming basics, benefiting 100+ students.
- Organized guest lectures and industry sessions, bridging academic learning with real-world insights.
