EXPERIENCE

AI/ML Intern, Medoc Health IT, Remote, India

Jan 2025 — May 2025

- Developed a Retrieval-Augmented Generation (RAG) assistant using LangChain and OpenAI embeddings, reducing internal insurance query resolution time by 65%
- Built a regression-based insurance premium prediction model using Random Forest Regressor and Linear Regression, achieving 91% accuracy on medical datasets.
- Engineered APIs in FastAPI, integrated with PostgreSQL and ChromaDB, to enable real-time retrieval of policy documents and smart claim recommendations.
- Integrated HuggingFace Transformers, scikit-learn, and vector databases into a unified backend, enabling real-time LLM inference workflows without containerization.

AI/ML Intern, Stellar 8 Labs, Indore, India

Sep 2024 — Dec 2024

- Designed a high-accuracy fraud detection model using XGBoost and AutoML Tables (Vertex AI), achieving 92% precision on imbalanced transaction data.
- Created a query prioritization system using custom ranking models and decision tree classifiers, reducing customer support latency by 70%.
- Deployed a real-time banking automation pipeline with GCP Pub/Sub, BigQuery, and Vertex AI Pipelines, decreasing manual operations by 25%.
- Implemented unsupervised anomaly detection using Isolation Forest and One-Class SVM, achieving 95% precision in identifying fraudulent financial behavior.

Intern - Data Analytics & Preprocessing, Alteryx (In-house), Indore, India

Jun 2024 — Aug 2024

- Automated ETL pipelines using Alteryx, significantly improving data processing efficiency by 50%.
- Built real-time data transformation workflows, reducing manual data cleaning efforts.
- Optimized SQL queries for large datasets, reducing processing time by 65% through efficient indexing and query structuring.

EDUCATION

MediCaps University, Indore, India - Bachelor, Computer Science & Engineering - GPA: 8.2

Aug 2021 — Jun 2025

Choithram School North Campus, Indore, India - Higher Secondary, Class XII - GPA: 8.8

Feb 2020 — May 2021

PROJECTS

Financial Chatbot Advisor, [Link](#)

- Developed a document-aware chatbot using LangChain + ChromaDB, enabling real-time extraction from embedded PDFs with 88% test accuracy.
- Integrated ChromaDB for vector-based document retrieval and embedded financial PDFs, enabling real-time extraction of policy clauses, investment rules, and compliance details.
- Built and deployed an interactive Streamlit interface supporting document upload, real-time Q&A, and response validation — showcasing end-to-end capabilities from LLM integration to full-stack AI deployment.

Medic Assistant, [Link](#)

- Engineered a GenAI-powered healthcare assistant that answers medical queries with 92% contextual accuracy using retrieval-based QA.
- Integrated LangChain, FAISS, and Gradio to build a chatbot handling queries across 5 medical domains during testing.
- Reduced hallucinations by 45% through embedding optimization and prompt tuning using a proprietary knowledge base.

Video Chapter Bot, [Link](#)

- Engineered an AI-powered video tagging pipeline using YOLOv5 and Google Vision API, enabling automatic chapter detection and tagging.
- Deployed Flask-based web interface integrated with Google Cloud Storage, automating frame-level object detection and metadata extraction.
- Optimized frame extraction and data pipelines, improving processing efficiency and scalability for handling large video datasets.

SKILLS

Programming Languages : Python, C++, HTML, CSS, JavaScript, SQL

ML & DL : TensorFlow, PyTorch, HuggingFace, OpenCV, Scikit-Learn, Matplotlib

NLP & LLM : LangChain, FAISS, LangGraph, RAG

Cloud : GCP, Vertex AI, Big Query, Docker, Pub/Sub

Tools : Alteryx, Power BI, Tableau, FastAPI, Flask
